proteintech®

Antibodies for Every Research Need

Polyclonal, Monoclonal, and Recombinant Antibodies Against 14,000+ Targets

Antibody Product Range:

- Primary antibodies against over 14,000 protein targets
- CoraLite® fluorescent dye–conjugated antibodies
- Labeling and conjugation kits
- Loading control antibodies – just €189
- Secondary antibodies

Uni-rAb™ Recombinant Antibody Range:

Proteintech's rapidly expanding range of recombinant antibodies covering over 10,000 targets.

- Multi-rAb™ primary and secondary antibodies
- Conjugated and unconjugated Uni-rAb antibodies
- FcZero-rAb™ for flow cytometry
- PBS-only Uni-rAb antibodies

Why Choose Proteintech Antibodies?

- Multiple formats available for each antibody target
- In stock with next-day delivery
- Convenient 20 µL trial sizes
- Comprehensive product guarantee
- Cited in 400,000+ publications worldwide
- Advanced 3D Epitope Mapping for 4,000+ products
- Tailored reagent and workflow recommendations with Able AI

ELISA Kits

Fast, Reliable ELISA Results

ELISA Kits for Every Research Need

From rapid one-step assays to traditional precoated sandwich formats, Proteintech ELISA Kits deliver speed and sensitivity without the premium price tag.

- 1,500+ kits available (human, mouse, rat)
- Prices from €269 – ~50% more cost-effective than leading competitors
- In stock with next-day delivery
- AuthentiKine™ premium ELISA kits

ELISA Results in <90 Minutes

Proteintech's Speedy One-Step ELISA Kits are manufactured in-house using antibody pairs with FcZero backbone technology to reduce Fc receptor-mediated non-specific binding.

- 300+ targets available
- Results in 90 minutes or less
- Single-wash protocol
- Unparalleled precision and sensitivity

Proteintech ELISA Kits Are 6× More Sensitive Than the Leading Competitor

Target	Proteintech	Leading Competitor	Sensitivity
AFP	7.32 pg/mL	44.8 pg/mL	6x more sensitive
IL-2	2.67 pg/mL	4.9 pg/mL	2x more sensitive
