## TPI1 Polyclonal antibody Catalog Number: 10713-1-AP Featured Product

Featured Product

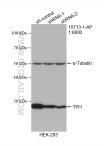

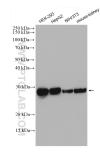

Basic Information	Catalog Number: 10713-1-AP	GenBank Accession Number: BC007086	Purification Method: Antigen affinity purification	
	Size:	GeneID (NCBI):	Recommended Dilutions:	
	150ul , Concentration: 500 ug/ml by Nanodrop; Source: Rabbit	7167	WB 1:2000-1:12000	
		UNIPROT ID:	IP 0.5-4.0 ug for 1.0-3.0 mg of total	
		P60174 protein lysate Full Name: triosephosphate isomerase 1 Calculated MW:		
				Isotype:
	lgG			
	Immunogen Catalog Number: AG1175			27 kDa
		Observed MW: 27 kDa		
	Applications	Tested Applications:	Positive Controls:	
WB, IP, ELISA		WB : H	: HEK-293 cells, A431 cells, HepG2 cells, rat liver	
Cited Applications: WB, IHC, IF, IP, CoIP			e, rat kidney tissue, RAW 264.7 cells, mouse live e, mouse kidney tissue, NIH/3T3 cells	
Species Specificity:		IP : HE	EK-293 cells,	
human, mouse, rat				
Cited Species:				
	human, mouse, rat, pig, chicken, yea	st. drosophila		
Background Information	human, mouse, rat, pig, chicken, yea TPI 1(Triosephosphate isomerase) is		longs to the triosephosphate isomerase family.	
Background Information	TPI 1(Triosephosphate isomerase) is is a key enzyme in cell metabolism	also named as TIM, TPI and bel that controls the glycolytic flov e phosphate (DHAP) and D-glyco	v and energy production through the eraldehyde 3-phosphate (G3P)(PMID:19251756	
	TPI 1(Triosephosphate isomerase) is is a key enzyme in cell metabolism interconversion of dihydroxyacetone Defects in TPI 1 are the cause of trios homodimer(PMID:18562316).	also named as TIM, TPI and bel that controls the glycolytic flov e phosphate (DHAP) and D-glyco	eraldehyde 3-phosphate (G3P)(PMID:19251756	
	TPI 1(Triosephosphate isomerase) is is a key enzyme in cell metabolism interconversion of dihydroxyacetone Defects in TPI 1 are the cause of trios homodimer(PMID:18562316).	also named as TIM, TPI and bel that controls the glycolytic flov e phosphate (DHAP) and D-glyco ephosphate isomerase deficier	v and energy production through the eraldehyde 3-phosphate (G3P)(PMID:19251756 ncy (TPI deficiency). It can exsit as a Application	
Background Information Notable Publications	TPI 1(Triosephosphate isomerase) is is a key enzyme in cell metabolism interconversion of dihydroxyaceton Defects in TPI 1 are the cause of trios homodimer(PMID:18562316). Author Pul Sunada Khadka 36:	also named as TIM, TPI and bel that controls the glycolytic flow e phosphate (DHAP) and D-glyco ephosphate isomerase deficier omed ID Journal	v and energy production through the eraldehyde 3-phosphate (G3P)(PMID:19251756 ncy (TPI deficiency). It can exsit as a <b>Application</b> WB

For technical support and original validation data for this product please contact: T: 1 (888) 4PTGLAB (1-888-478-4522) (toll free E: proteintech@ptglab.com in USA), or 1(312) 455-8498 (outside USA) W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

WB result of TPI1 antibody (10713-1-AP; 1:6000; incubated at room temperature for 1.5 hours) with sh-Control and sh-TPI1 transfected HEK-293 cells. Various lysates were subjected to SDS PAGE followed by western blot with 10713-1-AP (TPI1 antibody) at dilution of 1:6000 incubated at room temperature for 1.5 hours.

IP result of anti-TPI1 (IP:10713-1-AP, 3ug; Detection:10713-1-AP 1:1000) with HEK-293 cells lysate 2500ug.
