**FOXO3A**

**Polyclonal ANTIBODY**

**Catalog Number:** 10849-1-AP

---

**Basic Information**

**Catalog Number:** 10849-1-AP

**Size:** 53 μg/150 μl

**Source:** Rabbit

**Isotype:** IgG

**Purification Method:** Antigen affinity purification

**GenBank Accession Number:** BC020224

**GeneID (NCBI):** 2309

**Calculated MW:** 673aa, 71 kDa

**Observed MW:** 72-97 kDa

---

**Applications**

**Tested Applications:** IF, IHC, WB, ELISA

**Cited Applications:** IF, WB

**Species Specificity:** human, mouse, rat

**Cited Species:** human, mouse, pig, rat

**Note:** suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0

---

**Background Information**

In mammalian cells, FoxO factors act as potent transcriptional activators that upregulate the expression of programs of genes involved in stress resistance, cell cycle arrest, differentiation, apoptosis, autophagy, and metabolism. FOXO3 has a key role in the maintenance of adult neural and hematopoietic stem cells. It also associates with extreme longevity in humans and regulates the homeostasis of adult stem cell pools in mammals, which may contribute to longevity. Phosphorylation inhibits FOXO3 nuclear translocation that is essential for its regulation and function. The calculated molecular weight of FOXO3 is 71 kDa, but some experiments analysis using a FOXO3a specific antibody showed the expression of a 90 kDa full length FOXO3a protein (Full) and a 40 kDa processed FOXO3a product (Short). 90 kDa FOXO3a protein is a phosphorylated via activation of PI3K (phosphatidylinositol 3-kinase) and Akt after insulin stimulation, and translocate from the nucleus to the cytoplasm. (PMID: 19427386)

**Storage**

**Store at -20°C. Stable for one year after shipment.**

**Storage Buffer:** PBS with 0.1% sodium azide and 50% glycerol pH 7.3.

**Aliquoting is unnecessary for -20°C storage**
