Background Information

VPREB3 (formerly named 8HS20) is a protein that associates with mu chains in the endoplasmic reticulum of pre-B cell lines (PMID: 8491176; 22684248). VPREB3 is normally expressed by precursor B cells in bone marrow and by a subset of normal germinal center B cells in secondary lymphoid organs. It has been reported that VPREB3 expression is associated with B-cell tumors with c-MYC abnormalities (PMID: 20823132).
