**Basic Information**

- **Catalog Number:** 14295-1-AP
- **Size:** 42 μg/150 μl
- **Source:** Rabbit
- **Isotype:** IgG
- **Purification Method:** Antigen affinity purification
- **Immunogen Catalog Number:** AG5645
- **GenBank Accession Number:** BC181817
- **GeneID (NCBI):** 79523
- **Calculated MW:** 35 kDa
- **Observed MW:** 43-48 kDa

**Recommended Dilutions:**
- WB: 1:1000-1:4000
- IF: 1:10-1:200

**Applications**

- **Tested Applications:** IF, WB, ELISA
- **Cited Applications:** IF, IHC, WB
- **Species Specificity:** human, mouse, rat
- **Cited Species:** human, marmoset, mouse

**Background Information**

Nanog is a member of the homeobox family of DNA binding transcription factors and has been shown to maintain embryonic stem (ES) cell self-renewal independently of leukemia inhibitory factor (LIF)/Stat3. Nanog mRNA is present in pluripotent mouse and human cell lines, and absent from differentiated cells. Functionally, Nanog works together with other key pluripotent factors (Oct4, Sox2, and Lin28) to reprogram human fibroblasts and generate induced pluripotent stem (iPS) cells. These key factors form a regulatory network to support or limit each other's expression level, which maintains the properties of ES cells. Affinity purified rabbit anti-Nanog can be used to demonstrate pluripotency of ES and IPS cells. There are two kinds of variants could recognized by NANOG, one is normal form (~39kd), the other is post-translation modified form (~48kd) (21136380). Nanog exists two isoforms with molecular weight 34.4 kDa and 31.9 kDa. (PMID: 21998078)

**Storage**

- **Storage:** Store at -20°C. Stable for one year after shipment.
- **Storage Buffer:** PB5 with 0.02% sodium azide and 50% glycerol pH 7.3.
- **Aliquoting:** Not necessary for -20°C storage.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.
Confocal immunofluorescent analysis of human embryonic stem cells with 14295-1-AP at dilution of 1:200. The PE shows staining with 14295-1-AP/PE. The DAPI shows nuclear staining by DAPI.

Rat brain tissue were subjected to SDS PAGE followed by western blot with 14295-1-AP (NANOG Antibody) at dilution of 1:2000 incubated at room temperature for 1.5 hours.
