For Research Use Only

ADH4 Polyclonal antibody

Catalog Number: 16474-1-AP

Featured Product

	Catalog Number: 16474-1-AP	GenBank Accession Number: BC022319	Purification Method:	
			Antigen affinity purification	
	Size: 150ul , Concentration: 350 ug/ml by	GenelD (NCBI): 127	Recommended Dilutions: WB 1:500-1:2000	
	Nanodrop;	UNIPROT ID:	IHC 1:50-1:500	
	Source:	P08319		
	Rabbit	sotype: alcohol dehydrogenase 4 (class II), pi		
	Isotype: IgG			
	Immunogen Catalog Number: AG9568	Calculated MW: 380 aa, 40 kDa		
		Observed MW: 43 kDa		
Applications	Tested Applications:	Positive Controls:		
	WB, IHC, ELISA		WB : HepG2 cells, mouse brain tissue, HeLa cells, mouse liver tissue, rat liver tissue	
	Cited Applications: WB, IHC			
	Species Specificity: human, mouse, rat	IHC : human kidney tissue, human heart tissue		
	Cited Species: human			
	Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0			
	This gene encodes the class II alcohol dehydrogenase 4 pi subunit, which is a member of the alcohol dehydrogena family. Members of this enzyme family metabolize a wide variety of substrates, including ethanol, retinol, other aliphatic alcohols, hydroxysteroids, and lipid peroxidation products. Class II alcohol dehydrogenase is a homodim composed of 2 pi subunits. ADH4 plays a critical role in alcoholism development and alcohol toxicology and is als associated with the development of esophageal cancer(PMID:33556337, 26039424, 24051444, 22147505).			
Background Information	aliphatic alcohols, hydroxysteroids, composed of 2 pi subunits. ADH4 pla	ily metabolize a wide variety of and lipid peroxidation products. ys a critical role in alcoholism d	substrates, including ethanol, retinol, other Class II alcohol dehydrogenase is a homodi evelopment and alcohol toxicology and is a
