## MDM2 Polyclonal antibody

Catalog Number:19058-1-AP

Basic Information	Catalog Number: 19058-1-AP	GenBank Accession Number: NM_002392	Purification Method: Antigen affinity purification	
	Size:	GenelD (NCBI):	Recommended Dilutions:	
	150ul , Concentration: 300 µg/ml by Bradford method using BSA as the standard;	4193	WB 1:200-1:1000	
		UNIPROT ID: Q00987		
	Source: Rabbit Isotype: IgG	Full Name:		
		Mdm2 p53 binding protein homolog (mouse)		
				Calculated MW: 55 kDa
		Observed MW: 30-55 kDa, 60-100 kDa		
		Applications	Tested Applications:	Positive Controls: WB : A431 cells,
WB, ELISA				
Cited Applications: WB, IHC, IF, IP, COIP Species Specificity: human, mouse, rat				
			Cited Species:	
	human, mouse, rat, artemia sinica			
Background Information	human, mouse, rat, artemia sinica MDM2, also known as HDM2, is a pro and is over-expressed in a wide rang MDM2 can bind to the p53 tumor sup its ubiquitination and proteosomal d molecular mass of 25-55kD, and can and 75kD) are often observed which	e of human malignancies including pressor protein with high affinity, ar legradation (PMID: 17000718). MDM be detected as 90-97kD. In addition are likely to be produced by transla nobserved as 57-60kD in cell lines v	soft tissue carcinomas and breast cancer. nd negatively regulates p53 by mediating 2 has some isoforms with calculated to full length MDM2, two lower bands (85k tion initiation at methionine codons 50 and	
	human, mouse, rat, artemia sinica MDM2, also known as HDM2, is a prot and is over-expressed in a wide rang MDM2 can bind to the p53 tumor sup its ubiquitination and proteosomal d molecular mass of 25-55kD, and can and 75kD) are often observed which 60. Another isoform of MDM2 is ofter of MDM2 at residue 361 (PMID: 1956)	e of human malignancies including pressor protein with high affinity, ar legradation (PMID: 17000718). MDM be detected as 90-97kD. In addition are likely to be produced by transla nobserved as 57-60kD in cell lines v	soft tissue carcinomas and breast cancer. nd negatively regulates p53 by mediating 2 has some isoforms with calculated to full length MDM2, two lower bands (85k tion initiation at methionine codons 50 and which is indeed a caspase cleavage product

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

A431 cells were subjected to SDS PAGE followed by western blot with 19058-1-AP (MDM2 Antibody) at dilution of 1:300 incubated at 4 degree celsius over night.
