For Research Use Only

SMO Polyclonal antibody

Catalog Number: 20787-1-AP 39 Publications

Basic Information

Catalog Number: GenBank Accession Number:

20787-1-AP BC009989 GeneID (NCBI): Size:

150ul , Concentration: 800 ug/ml by Nanodrop; **UNIPROT ID:** Q99835 Rabbit Full Name:

Isotype: smoothened homolog (Drosophila)

6608

IgG Calculated MW: Immunogen Catalog Number: 787 aa, 86 kDa

AG14322

Applications

Tested Applications:

IHC, ELISA Cited Applications:

IHC, IF

Species Specificity: human, mouse, rat **Cited Species:** human, mouse, chicken

Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0

Positive Controls:

IHC: human prostate cancer tissue, human testis tissue, human colon cancer tissue, mouse testis tissue, rat testis tissue

Purification Method:

IHC 1:500-1:2000

Antigen affinity purification

Recommended Dilutions:

Background Information

Smoothened (SMO) is a G protein-coupled receptor that is a component of the hedgehog (Hh) signaling pathway and is conserved from flies to humans. The Hh pathway plays a central role in animal development and stem-cell function. Defects in Hh signaling lead to birth defects and cancer in humans. Expressed on the primary cilium, SMO interacts with the patched protein, a receptor for Hh proteins.

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

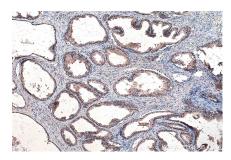

Storage Buffer:

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

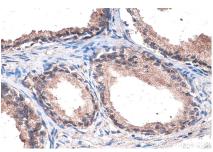

Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

Selected Validation Data

Immunohistochemical analysis of paraffinembedded human prostate cancer tissue slide using 20787-1-AP (SMO antibody) at dilution of 1:1000 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).
