For Research Use Only

SOST/Sclerostin Polyclonal antibody

Catalog Number:21933-1-AP

Featured Product

15 Publications

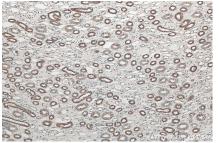

Antibodies | ELISA kits | Proteins www.ptglab.com

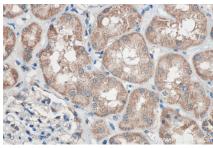

| Basic Information | Catalog Number: 21933-1-AP | GenBank Accession Number: BC 101086 | Purification Method: | |
|------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| | | | Antigen affinity purification | |
| | Size: 150ul , Concentration: 550 ug/ml by | GenelD (NCBI): 50964 | Recommended Dilutions: IHC 1:50-1:500 | |
| | Nanodrop; | UNIPROT ID: | IF/ICC 1:50-1:500 | |
| | Source: | Q9BQB4 | | |
| | Rabbit | Full Name: | | |
| | lsotype: | sclerosteosis | | |
| | IgG | Calculated MW: | | |
| | Immunogen Catalog Number: AG16567 | 213 aa, 24 kDa | | |
| Applications | Tested Applications: | Positive Controls: | | |
| | IHC, IF/ICC, ELISA | | IHC : human kidney tissue, human breast cancer tissu | |
| | Cited Applications: WB, IHC, IF | mouse lung tissue, mouse embryo tissue | | |
| | Species Specificity: human, mouse | IF/ICC : HepG2 cells, | | |
| | Cited Species: human, mouse, rat | | | |
| | Note-IHC: suggested antigen I TE buffer pH 9.0; (*) Alternati | vely, antigen | | |
| | retrieval may be performed w buffer pH 6.0 | vith citrate | | |
| Background Information | buffer pH 6.0 Sclerostin is a secreted glycoprotein the DAN (differential screening-selec (BMP) antagonists. Loss-of-function n | with a C-terminal cysteine knot-l cted gene aberrative in neuroblas nutations in this gene are associa ive bone overgrowth. A deletion c | toma) family of bone morphogenetic protein ted with an autosomal-recessive disorder, lownstream of this gene, which causes reduce | |
| | buffer pH 6.0 Sclerostin is a secreted glycoprotein the DAN (differential screening-selec (BMP) antagonists. Loss-of-function n sclerosteosis, which causes progressi sclerostin expression, is associated w | with a C-terminal cysteine knot-l cted gene aberrative in neuroblas nutations in this gene are associa ive bone overgrowth. A deletion c | ted with an autosomal-recessive disorder, lownstream of this gene, which causes reduced | |
| | buffer pH 6.0 Sclerostin is a secreted glycoprotein the DAN (differential screening-selec (BMP) antagonists. Loss-of-function n sclerosteosis, which causes progress sclerostin expression, is associated w | with a C-terminal cysteine knot-l cted gene aberrative in neuroblas nutations in this gene are associa- ive bone overgrowth. A deletion of vith a milder form of the disorder bmed ID Journal | toma) family of bone morphogenetic protein ted with an autosomal-recessive disorder, lownstream of this gene, which causes reduce called van Buchem disease Application | |
| Background Information Notable Publications | buffer pH 6.0 Sclerostin is a secreted glycoprotein the DAN (differential screening-selec (BMP) antagonists. Loss-of-function m sclerosteosis, which causes progressis sclerostin expression, is associated w Author Put Fang He | with a C-terminal cysteine knot-l cted gene aberrative in neuroblas nutations in this gene are associa ive bone overgrowth. For technical support and original validation data for this product please contact:T: 1 (888) 4PTGLAB (1-888-478-4522) (toll freeE: proteintech@ptglab.comin USA), or 1(312) 455-8498 (outside USA)W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Immunohistochemical analysis of paraffin-21933- embedded human kidney tissue slide using 21933-00 1-AP (Sclerostin antibody) at dilution of 1:200 rieval (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunofluorescent analysis of (-20°C Ethanol) fixed HepG2 cells using Sclerostin antibody (21933-1-AP) at dilution of 1:200 and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L), CL594-Phalloidin (red).

Immunohistochemical analysis of paraffinembedded human kidney tissue slide using 21933-1-AP (Sclerostin antibody) at dilution of 1:200 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).
