## ACE Polyclonal antibody Catalog Number:24743-1-AP 31 Publications

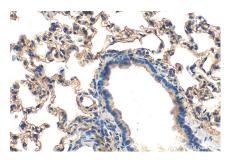

Basic Information	Catalog Number: 24743-1-AP	GenBank Accession Number: BC036375	Purification Method: Antigen affinity purification
	Size:	GenelD (NCBI):	Recommended Dilutions:
	150ul , Concentration: 600 ug/ml by Nanodrop;	1636	WB 1:500-1:2000 IHC 1:50-1:500
		UNIPROT ID:	
	Source: Rabbit	P12821	
		Full Name: angiotensin I converting enzyme (peptidyl-dipeptidase A) 1 Calculated MW:	
	Isotype: IgG		
	Immunogen Catalog Number: AG20654		
		150 kDa	
		Observed MW: 170 kDa	
Applications	Tested Applications:	Positive Controls: WB : mouse heart tissue, IHC : rat lung tissue, human lung tissue, mouse lung tissue	
	WB, IHC, ELISA		
	Cited Applications: WB, IHC, IF		
	Species Specificity: human, mouse, rat		
	Cited Species: human, mouse, rat, bovine		
	Note-IHC: suggested antigen ı TE buffer pH 9.0; (*) Alternati retrieval may be performed w buffer pH 6.0	vely, antigen	
	ACE(Angiotensin-converting enzyme) is also named as DCP, DCP1 and belongs to the peptidase M2 family. It is involved in catalyzing the conversion of angiotensin I into a physiologically active peptide angiotensin II. ACE als has a glycosidase activity which releases GPI-anchored proteins from the membrane by cleaving the mannose linkage in the GPI moiety. It has 4 isoforms produced by alternative splicing. The full length protein has 15 glycosylation sites and it can show a molecular weight of 170 kDa(PMID:16804085).

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

mouse heart tissue were subjected to SDS PAGE followed by western blot with 24743-1-AP (ACE Antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours.

Immunohistochemical analysis of paraffinembedded rat lung tissue slide using 24743-1-AP (ACE antibody) at dilution of 1:200 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).
