Integrin Beta 1 Monoclonal antibody

Catalog Number:66315-1-lg 2 Publications

Basic Information	Catalog Number: 66315-1-1g	GenBank Accession Number: BC020057	Purification Method: Protein G purification
	Size:	GenelD (NCBI):	CloneNo.:
	150ul , Concentration: 2300 ug/ml by		1A7C9
	Nanodrop and 1000 ug/ml by Bradfor method using BSA as the standard;	^d ENSEMBL Gene ID: ENSG00000150093	Recommended Dilutions: WB 1:2000-1:16000
	Source: Mouse	UNIPROT ID: P05556	
	lsotype:	Full Name:	
	Immunogen Catalog Number:	integrin, beta 1 (fibronectin receptor, beta polypeptide, antigen CD29 includes MDF2, MSK12)	
		Observed MW:	
		130 kDa	
	Applications	Tested Applications:	Positive Controls: WB : HT-1080 cells, HUVEC cells
WB, ELISA			
Cited Applications: WB			
Species Specificity: human			
Cited Species:			
human, rat			
	Integrin beta-1 (ITGB1), also named as CD29, is a 130 kDa single chain type I glycoprotein that is expressed in a heterodimeric complex with one of six distinct a subunits, comprising the very late activation antigen (VLA) subfamily of adhesion receptors. It is one of the essential surface molecules expressed on human MSC from bone marrow and other sources. The β 1 subunit is also broadly expressed on lymphocytes and monocytes, weakly expressed on granulocytes, and not expressed on erythrocytes. These receptors are involved in a variety of cell-ce and cell-matrix interactions.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

HT-1080 cells were subjected to SDS PAGE followed by western blot with 66315-1-1g (Integrin beta-1 Antibody) at dilution of 1:8000 incubated at room temperature for 1.5 hours.
