

Prestained Protein Markers

- For western blotting and electrophoresis applications
- Available in standard, broad, and extra broad range
- Compatible with colorimetric or fluorescence detection

protein marker
sample

▲ Resolution of prestained protein ladders in 8-16% Tris-glycine gel (SDS-PAGE). The image shows a migration pattern comparison for our standard (PL00001), broad (PL00002), and extra broad (PL00003) range ladders.

**Prestained Protein
Marker 10 –180 kDa**

Catalog No.	Molecular Weight:
PL00001	10, 15, 25, 35, 45, 60, 75, 100, 140, 180 kDa
Detection Method:	Product Size:
Colorimetric Fluorescence	100uL, 2x250uL or 10X250uL
Number of Markers:	Stain Type:
10	Blue, Red, Green
Prices	100uL - €59 2X250uL - €109 10X250uL - €399

**Broad Range Prestained
Protein Marker 3 –245 kDa**

Catalog No.	Molecular Weight:
PL00002	3,10, 15, 20, 25, 35, 45, 60, 75, 100, 140, 180, 245 kDa
Detection Method:	Product Size:
Colorimetric Fluorescence	100uL, 2x250uL or 10X250uL
Number of Markers:	Stain Type:
13	Blue, Red, Green
Prices	100uL - €69 2X250uL - €129 10X250uL - €429

**Extra Range Prestained
Protein Marker 10 –310 kDa**

Catalog No.	Molecular Weight:
PL00003	10, 15, 25, 35, 45, 60, 75, 100, 140, 180, 245, 310 kDa
Detection Method:	Product Size:
Colorimetric Fluorescence	100uL, 2x250uL or 10X250uL
Number of Markers:	Stain Type:
12	Blue, Red, Green
Prices	100uL - €79 2X250uL - €149 10X250uL - €449
