## For Research Use Only

TMEM173/STING Polyclonal antibody proteintech®

Catalog Number:19851-1-AP

Featured Product

250 Publications

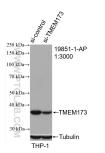

Basic Information	Catalog Number: GenBank Accession Number: 19851-1-AP BC047779		n Number:	Purification Method: Antigen affinity purification						
	Size: 150ul, Concentration: 700 µg/ml by Nanodrop; Source: Rabbit Isotype: IgG Immunogen Catalog Number: AG13921	GeneID (NCBI): 340061 UNIPROT ID: Q86WV6 Full Name: transmembrane protein 173 Calculated MW: 379 aa, 42 kDa		Recommended Dilutions: WB 1:1000-1:4000 IP 0.5-4.0 ug for 1.0-3.0 mg of total protein lysate IHC 1:2000-1:8000 IF 1:50-1:500						
					Observed MW: 35-40 kDa, 80 kDa					
					Applications	Tested Applications: WB, IP, IF, FC, IHC, ELISA Cited Applications:		Positive Con	Positive Controls:	
								WB : HL-60 cells, mouse spleen tissue, Raji cells, HEK- 293 cells, THP-1 cells, HepG2 cells, mouse kidney		
						WB, IP, IF, FC, IHC, CoIP, Blocking ass	ay		tissue, HT-29 cells, mouse thymus tissue, C2C12 cells	
						Species Specificity: human, mouse, rat Cited Species: human, rat, mouse, monkey, pig		mouse testis	mouse testis tissue	
		IP : mouse spleen tissue,								
	IHC : human tonsillitis tissue, rat thymus tissue, mous thymus tissue, human spleen tissue, human liver									
Note-IHC: suggested antigen i		cancer tissue								
TE buffer pH 9.0; (*) Alternati retrieval may be performed w buffer pH 6.0		IF : HT-29 cel	ls, human tonsillitis tissue, THP-1 cells							
	Stimulator of interferon genes (STING, also known as ERIS, MITA and MPYS, and encoded by TMEM173) is a transmembrane adaptor protein that facilitates innate immune signaling (PMID: 18724357). STING is widely expressed in various cell types such as endothelial cells, epithelial cells, T cells, macrophages, and dendritic cells (PMID: 26603901). It is predominantly located in the endoplasmic reticulum (ER). STING functions as a sensor of cytosolic DNA and promotes the production of type I interferons and pro-inflammatory cytokines. STING is a 379 amino acid protein with a calculated molecular weight of 42 kDa. It has been observed at 35-40 kDa (PMID: 27324217; 29632140; 30918080), and 70-80 kDa corresponding to the expected size of a STING dimer (PMID: 25790474; 29491158).									
Background Information	transmembrane adaptor protein that expressed in various cell types such (PMID: 26603901). It is predominantl cytosolic DNA and promotes the proc amino acid protein with a calculated 27324217; 29632140; 30918080), and	facilitates innate in as endothelial cells, y located in the end luction of type I inter molecular weight o	nmune signaling ( epithelial cells, 7 oplasmic reticulu rferons and pro-in f 42 kDa. It has be	PMID: 18724357). STING is widely cells, macrophages, and dendritic cells m (ER). STING functions as a sensor of flammatory cytokines. STING is a 379 en observed at 35-40 kDa (PMID:

## Selected Validation Data

WB result of TMEM173/STING antibody (19851-1-AP; 1:3000; incubated at room temperature for 1.5 hours) with sh-Control and sh-TMEM173/STING transfected THP-1 cells.

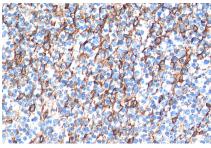

WB result of TMEM173/STING antibody (19851-1-AP; 1:6000; room temperature for 1.5 hours) with wild-type and TMEM173/STING knockout HepG2 cells.

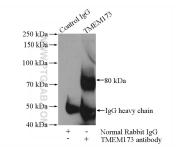

HL-60 cells were subjected to SDS PAGE followed by western blot with 19851-1-AP (TMEM173/STING antibody) at dilution of 1:2000 incubated at room temperature for 1.5 hours.

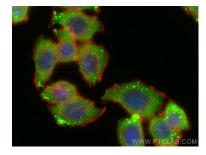

Immunohistochemical analysis of paraffinembedded human tonsillitis tissue slide using 19851-1-AP (TMEM173/STING antibody) at dilution of 1:4000 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

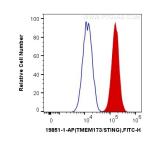

Immunohistochemical analysis of paraffinembedded human tonsillitis tissue slide using 19851-1-AP (TMEM173/STING antibody) at dilution of 1:4000 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

IP result of anti-TMEM173/STING (IP:19851-1-AP, 4ug; Detection:19851-1-AP 1:1000) with mouse spleen tissue lysate 4000ug.

Immunofluorescent analysis of (-20°C Ethanol) fixed HT-29 cells using TMEM173/STING antibody (19851-1-AP) at dilution of 1:200 and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L), CL594-phalloidin (red).

1X10^6 THP-1 cells were intracellularly stained with 0.4 ug Anti-Human TMEM173/STING (19851-1-AP) and CoraLite® 488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) at dilution 1:1000 (red), or 0.4 ug Control Antibody. Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C).
