SFRS2 Polyclonal antibody

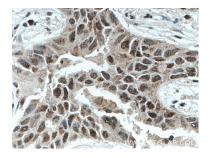

Catalog Number:20371-1-AP 7 Publications

Antibodies | ELISA kits | Proteins WWW.ptglab.com

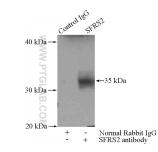

Basic Information	Catalog Number: 20371-1-AP	GenBank Accession Number: NM_003016	Purification Method: Antigen affinity purification		
	Size:	GenelD (NCBI):	Recommended Dilutions:		
	150ul , Concentration: 600 µg/ml by Nanodrop; Source: Rabbit Isotype: IgG	6427 UNIPROT ID:	WB 1:1000-1:8000 IP 0.5-4.0 ug for 1.0-3.0 mg of total protein lysate IHC 1:50-1:500		
				Q01130	
		Full Name: splicing factor, arginine/serine-rich 2			
				Calculated MW: 25 kDa	
		Observed MW: 25-35 kDa			
		Applications	Tested Applications:	Positive Controls:	
			IHC, IP, WB, ELISA Cited Applications:		NIH/3T3 cells, mouse testis tissue, A549 cells, ra n tissue, HepG2 cells
CoIP, IF, WB	IP : mouse		e brain tissue,		
Species Specificity: human, mouse, rat	IHC : hum		IHC : human lung cancer tissue,		
Cited Species: human, mouse Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0					
				SFRS2, also named as PR264 and Splicing component, 35 kDa, belongs to the splicing factor SR family. SFRS2 is necessary for the splicing of pre-mRNA. Some residue of SFRS2 is modified by phosphorylase and acetylase after translation. The molecular weight of modified SFRS2 is 35-40kDa. It is required for formation of the earliest ATP-dependent splicing complex and interacts with spliceosomal components bound to both the 5'- and 3'-splice sites during spliceosome assembly. It also is required for ATP-dependent interactions of both U1 and U2 snRNPs with pre-mRNA. It binds to purine-rich RNA sequences, either 5'-AGSAGAGTA-3' (S=C or G) or 5'-GTTCGAGTA-3'. SFRS2 can bind to beta-globin mRNA and commit it to the splicing pathway. The antibody has no cross reaction to SFRS2B.	
Background Information	necessary for the splicing of pre-mRN translation. The molecular weight of dependent splicing complex and inte during spliceosome assembly. It also mRNA. It binds to purine-rich RNA see	A. Some residue of SFRS2 is modif modified SFRS2 is 35-40kDa. It is p racts with spliceosomal component is required for ATP-dependent int quences, either 5'-AGSAGAGTA-3' (fied by phosphorylase and acetylase after required for formation of the earliest ATP- nts bound to both the 5'- and 3'-splice sites eractions of both U1 and U2 snRNPs with pre S=C or G) or 5'-GTTCGAGTA-3'. SFRS2 can

Selected Validation Data

Immunohistochemical analysis of paraffinembedded human lung cancer tissue slide using 20371-1-AP (SFRS2 antibody) at dilution of 1:200 (under 40x lens. Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

IP result of anti-SFRS2 (IP:20371-1-AP, 4ug; Detection:20371-1-AP 1:300) with mouse brain tissue lysate 4000ug.

Various lysates were subjected to SDS PAGE followed by western blot with 20371-1-AP (SFRS2 antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours.
