Background Information

C20orf112, also termed as chromosome 20 open reading frame 112, is a 436 amino acid protein, which consists of a relatively hydrophobic N terminal region and two putative small coiled-coil domains. C20orf112 may likely involve in endocytosis pathway and normal brain development. It also is required to mediate the cell energy response. The function of C20orf112 is still non-known and mechanism is required to further study.
