HIF2a/EPAS1 Polyclonal antibody

Catalog Number:26422-1-AP

10 Publications

Basic Information	Catalog Number: 26422-1-AP	GenBank Accession Number: BC051338	Purification Method: Antigen affinity purification	
	Size: 150ul , Concentration: 700 µg/ml by	GenelD (NCBI): 2034	Recommended Dilutions: WB 1:500-1:3000	
	Nanodrop;	Full Name:		
	Source:	endothelial PAS domain prot	tein 1	
	Rabbit	Calculated MW:		
	Isotype: IgG	96 kDa		
	Immunogen Catalog Number: AG24886	Observed MW: 100-120 kDa		
Applications	Tested Applications: WB, ELISA	Positive Controls: WB : Cobalt Chloride treated HeLa cells,		
	Cited Applications: CoIP, IF, IHC, WB			
	Species Specificity: human			
	Cited Species: human, mouse			
Background Information	placenta, lung and heart. HIF2A colo involves in the induction of oxygen i hypoxia response element (HRE) of t (VEGF) expression and seems to be i HIF2A may also play a role in the for calculated molecular weight of HIF2 Pro-531 by EGLN1/PHD1, EGLN2/PHE VHL, initiating rapid ubiquitination a	calizes with HIF3A in the nucle egulated genes. HIF2A binds t arget gene promoters. HIF2A ro mplicated in the development mation of the endothelium tha A is 96 kDa, but In normoxia, H D2 and/or EGLN3/PHD3. The hy and subsequent proteasomal de	us and speckles. HIF2A as a transcription factor o core DNA sequence 5'-[AG]CGTG-3' within the egulates the vascular endothelial growth factor of blood vessels and the tubular system of lung at gives rise to the blood brain barrier. The IIF2A is probably hydroxylated on Pro-405 and droxylated prolines promote interaction with

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Cobalt Chloride treated HeLa cells were subjected to SDS PAGE followed by western blot with 26422-1-AP (EPAS1 antibody) at dilution of 1:1500 incubated at room temperature for 1.5 hours.
