Background

AQP5 is a member of aquaporins (AQPs) which are membrane proteins functioning as water channels and involved in the bidirectional transfer of water and small solutes across cell membranes. AQP5 is widely expressed including digestive, renal, respiratory, and reproductive systems. AQP5 overexpression in cancer cells and tumor tissues has been extensively reported. Recently AQP5 has been identified as a marker for adult pyloric stem cells.

Synonyms

AQP 5, AQP5, aquaporin 5
