

For Research Use Only

GST Tag Polyclonal antibody

Catalog Number: 10000-0-AP **61 Publications**

Basic Information

Catalog Number: 10000-0-AP
Size: 150UL, Concentration: 513 µg/ml by Bradford method using BSA as the standard;
Source: Rabbit
Isotype: IgG

GenBank Accession Number: FN315687
GeneID (NCBI):
Full Name:
Calculated MW: 26 kDa

Purification Method: Antigen affinity purification
Recommended Dilutions: WB 1:1000-1:4000

Applications

Tested Applications: FC, WB, ELISA
Cited Applications: IP, WB
Species Specificity: recombinant protein

Positive Controls:
WB: Recombinant protein,

Background Information

GST (Glutathione S-Transferase) is a widely used protein tag encoded by the Schistosoma japonicum. GST provides both an easily detectable tag and a simple purification process with little effect on the biological function of the protein of interest. This GST-fusion protein can then be purified from cells via its high affinity for glutathione. Antibodies to GST are useful for checking protein expression both in plaques and on western blots as well as for immunoaffinity purification of proteins expressed in cells. This antibody can be used to detect the GST tagged protein. This antibody can be used as Rabbit IgG control in FC.

Notable Publications

Author	Pubmed ID	Journal	Application
Tianyu Han	30231667	Autophagy

Storage

Storage: Store at -20°C. Stable for one year after shipment.
Storage Buffer: PBS with 0.1% sodium azide and 50% glycerol pH 7.3.
Aliquoting is unnecessary for -20°C storage

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

1X10⁶ HeLa cells were stained with 0.20 ug PSMD9 antibody (26922-1-AP, red) and 0.20 ug Rabbit IgG control (10000-0-AP, blue). Fixed with 90% MeOH.

Western blot of GST-tagged fusion protein with anti-GST-tag (10000-0-AP) at various dilutions.
