ADAM12 Polyclonal ANTIBODY

Catalog Number: 14139-1-AP

Basic Information

Catalog Number: 14139-1-AP
Size: 39 μg/150 μl
Source: Rabbit
Isotype: IgG
Purification Method: Antigen affinity purification
Immunogen Catalog Number: AG5206

GenBank Accession Number: BC060604
Gene ID (NCBI): 8038
Full Name: ADAM1 metallopeptidase domain 12
Calculated MW: 100 kDa
Observed MW: 90-100 kDa, 70-80 kDa

Recommended Dilutions:
WB: 1:500-1:2000
IP: 0.5-4.0 μg for IP and 1:100-1:1000 for WB
IHC: 1:30-1:500
IF: 1:10-1:100

Applications

Tested Applications:
IF, IHC, IP, WB, ELISA
Cited Applications:
FC, IF, IHC, IP, WB
Species Specificity:
human, mouse
Cited Species:
human, mouse, rat

Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0

Background Information

ADAM12, also named as MLTN and Meltrin-alpha, is involved in skeletal muscle regeneration, specifically at the onset of cell fusion. It is also involved in macrophage-derived giant cells (MGC) and osteoclast formation from mononuclear precursors. ADAM12 is expressed in human malignant tumors. It is involved in the regulation of growth factor activities and integrin functions, leading to promotion of cell growth and invasion, although the precise mechanisms of these are not clear at the present time. ADAM12’s ability to degrade extracellular matrix components likely allows it to detach cancer cells from the basement membrane and assist them on their route to metastasis. But the protein’s role not just as a biomarker of breast cancer but as a gateway to cancer cell migration is only now being understood. ADAM12 has 2 isoforms with the calculated molecular mass of 100 and 80 kDa, and this antibody can recognize all isoforms of ADAM12. ADAM12 has 4 forms: 120kd full-length form, 90kd mature (processed form that lack the prodomain); 50-68kd degradation product and 27kd prodomain.

Storage

Storage:
Store at -20ºC. Stable for one year after shipment.

Storage Buffer:
PBS with 0.05% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20 ºC storage
