**Rb Polyclonal ANTIBODY**

**Catalog Number:** 17218-1-AP

### Basic Information

- **Catalog Number:** 17218-1-AP
- **Size:** 21 μg/150 μl
- **Source:** Rabbit
- **Isotype:** IgG
- **Purification Method:** Antigen affinity purification

**Immunogen Catalog Number:** AG11035

**GenBank Accession Number:** BC039060

**GeneID (NCBI):** 5925

**Retinoblastoma 1**

**Calculated MW:** 928aa, 106 kDa

**Observed MW:** 110 kDa

### Recommended Dilutions:

- **WB:** 1:500-1:1000

### Featured Product

- 8 Publications

### Applications

- **Tested Applications:** WB, ELISA
- **Cited Applications:** WB
- **Species Specificity:** human
- **Cited Species:** human, zebrafish

### Positive Controls:

- **WB:** HT-1080 cells

### Background Information

Rb1, also named as pp110, pRb and p105 Rb, belongs to the retinoblastoma protein (Rb) family. It is a key regulator of entry into cell division that acts as a tumor suppressor. Rb1 acts as a transcription repressor of E2F1 target genes. The underphosphorylated, active form of Rb1 interacts with E2F1 and represses its transcription activity, leading to cell cycle arrest. It is directly involved in heterochromatin formation by maintaining overall chromatin structure and, in particular, that of constitutive heterochromatin by stabilizing histone methylation. It recruits and targets histone methyltransferases SUZ12H1, SUZ12H1 and SUZ12H2, leading to epigenetic transcriptional repression. Rb1 controls histone H4 Lys-20 trimethylation and inhibits the intrinsic kinase activity of TAF1. It mediates transcriptional repression by SNARF/AR/SRS1 by recruiting a histone deacetylase (HDAC) complex to the c-fos promoter. In resting neurons, transcription of the c-fos promoter is inhibited by BRG1-dependent recruitment of a phospho-Rb1/HDAC1 repressor complex. Upon calcium influx, Rb1 is dephosphorylated by calcineurin, which leads to release of the repressor complex. In case of viral infections, interactions with SV40 large T antigen, HPV E7 protein or adenovirus E1A protein induce the disassembly of Rb1-E2F1 complex thereby disrupting Rb1's activity. This antibody is a rabbit polyclonal antibody raised against residues near the C terminus of human Rb1.

### Storage

- **Storage:** Store at -20ºC. Stable for one year after shipment.
- **Storage Buffer:** PBS with 0.02% sodium azide and 50% glycerol pH 7.3.
- **Aliquoting is unnecessary for -20ºC storage**
