## SFRS2 Polyclonal antibody Catalog Number: 20371-1-AP Featured Product

Featured Product

**15** Publications

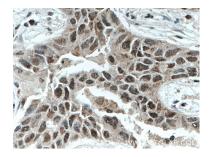

Basic Information	Catalog Number: 20371-1-AP	GenBank Accession Number: NM_003016	Purification Method: Antigen affinity purification	
	Size:	GenelD (NCBI):	Recommended Dilutions:	
	150ul , Concentration: 600 ug/ml by		WB 1:1000-1:8000	
	Nanodrop;	UNIPROT ID:	IP 0.5-4.0 ug for 1.0-3.0 mg of total	
	Source:	Q01130	protein lysate	
	Rabbit	Full Name:	IHC 1:50-1:500 IF/ICC 1:1500-1:6000	
	lsotype:	splicing factor, arginine/serine-rich 2		
	lgG	Calculated MW: 25 kDa		
		Observed MW: 25-35 kDa		
Applications	Tested Applications:	Positive Controls:		
	WB, IHC, IF/ICC, IP, ELISA Cited Applications:		WB : NIH/3T3 cells, mouse testis tissue, A549 cells, ra brain tissue, HepG2 cells	
	WB, IF, RIP	IP : mouse	brain tissue,	
	Species Specificity:	IHC : huma	n lung cancer tissue,	
	IE/ICC: HenG2 cells		pG2 cells,	
	Cited Species: human, mouse, rat		•	
	TE buffer pH 9.0; (*) Alternati retrieval may be performed w buffer pH 6.0			
Background Information	necessary for the splicing of pre-mRN translation. The molecular weight of dependent splicing complex and inte during spliceosome assembly. It also mRNA. It binds to purine-rich RNA see	IA. Some residue of SFRS2 is modifi- modified SFRS2 is 35-40kDa. It is re- eracts with spliceosomal component o is required for ATP-dependent inte- quences, either 5'-AGSAGAGTA-3' (S	the splicing factor SR family. SFRS2 is ed by phosphorylase and acetylase after quired for formation of the earliest ATP- is bound to both the 5'- and 3'-splice sites ractions of both U1 and U2 snRNPs with pre =C or G) or 5'-GTTCGAGTA-3'. SFRS2 can tibody has no cross reaction to SFRS2B.	
Background Information	necessary for the splicing of pre-mR translation. The molecular weight of dependent splicing complex and inte during spliceosome assembly. It also mRNA. Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

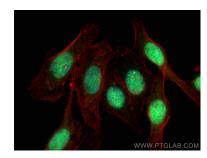

Immunohistochemical analysis of paraffinembedded human lung cancer tissue slide using 20371-1-AP (SFRS2 antibody) at dilution of 1:200 (under 40x lens. Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

IP result of anti-SFRS2 (IP:20371-1-AP, 4ug; Detection:20371-1-AP 1:300) with mouse brain tissue lysate 4000ug.

Various lysates were subjected to SDS PAGE followed by western blot with 20371-1-AP (SFRS2 antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours.

Immunofluorescent analysis of (4% PFA) fixed HepC2 cells using SFRS2 antibody (20371-1-AP) at dilution of 1:3000 and Multi-rAb Coralite ® Plus 488-Goat Anti-Rabbit Recombinant Secondary Antibody (H+L) (RGAR002), CL594-phalloidin (red).
