DNMT3A Polyclonal antibody Catalog Number: 20954-1-AP Featured Product 53 Publications

Basic Information	Catalog Number: 20954-1-AP	GenBank Accession Number: BC043617		Purification Method: Antigen affinity purification	
	Size: 150ul , Concentration: 600 ug/ml by Nanodrop; Source: Rabbit Isotype: IgG Immunogen Catalog Number: AG15111	GeneID (NCBI): 1788 UNIPROT ID: Q9Y6K1 Full Name: DNA (cytosine-5-)-n 3 alpha Calculated MW: 912 aa, 102 kDa Observed MW: 120-130 kDa		Recommended Dilutio WB: 1:5000-1:50000 IP: 0.5-4.0 ug for 1.0-3.0 protein lysate IHC: 1:500-1:2000 IF/ICC: 1:200-1:800	
Applications	Tested Applications: WB, IHC, IF/ICC, IP, ELISA		Positive Controls:		
	Cited Applications: WB, IHC, IF, ChIP, RIP		WB : Jurkat cells, HEK-293 cells, HepG2 cells, HeLa cells, NIH/3T3 cels, mouse testis tissue, rat testis tissue		
	Species Specificity:		IP : HeLa cells,	,	
	Cited English		IHC : mouse te tissue, rat testi	testis tissue, mouse colon tissue, rat colo tis tissue	
	human, mouse, rat, goat Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0			cells, HeLa cells	
Background Information	DNA methylation in vertebrate animals is an epigenetic modification that is important for embryonic development, imprinting, and the inactivation of X chromosomes. DNA methylation is catalyzed by a family of DNA methyltransferases (DNMTs) that include the maintenance enzyme DNMT1 and de novo methyltransferases DNMT3a and DNMT3b. The overexpression of DNMT1, DNMT3a, and DNMT3b has been reported in various malignancies, including gastric, urothelial, and lung cancers, and may be related to tumorigenesis, tumor progression, and poor survival. Two isoforms of DNMT3a exist: the full-length DNMT3a, and the shorter form DNMT3a2 which lacks the N- terminal fragment. DNMT3a is expressed ubiquitously at low levels, while DNMT3a2 is specially expressed at high levels in embryonic stem cells and shows restricted expression in tissues known to undergo de novo methylation including testis and ovary. This antibody was raised against the N-terminal region of human DNMT3a. It is expected to detect the 120-130 kDa DNMT3a but not 72-100 kDa DNMT3a2.				
	and DNMT3b. The overexpression of including gastric, urothelial, and lun survival. Two isoforms of DNMT3a ex terminal fragment. DNMT3a is expre levels in embryonic stem cells and s including testis and ovary. Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 20954-1-AP (DNMT3A antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours.

Immunofluorescent analysis of (4% PFA) fixed K-562 cells using DNMT3A antibody (20954-1-AP) at dilution of 1:400 and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L).

WB result of DNMT3A antibody (20954-1-AP; 1:12000; incubated at room temperature for 1.5 hours) with sh-Control and sh-DNMT3A transfected HepG2 cells.

Immunohistochemical analysis of paraffinembedded mouse testis tissue slide using 20954-1-AP (DNMT3A antibody) at dilution of 1:1000 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

IP result of anti-DNMT3A (IP:20954-1-AP, 4ug; Detection:20954-1-AP 1:5000) with HeLa cells lysate 1560 ug.

Immunofluorescent analysis of (4% PFA) fixed HeLa cells using DNMT3A antibody (20954-1-AP) at dilution of 1:400 and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) (SA00013-2), CL594-phalloidin (red).
