Background Information

KBTBD10, also named as KBTBD10 or KRP1, is a 606 amino acid protein, which contains one BACK (BTB/Kelch associated) domain, one BTB (POZ) domain and five Kelch repeats. KBTBD10 localizes in the cytoplasm and is expressed in Sarcomeric muscle. KBTBD10 is involved in skeletal muscle development and differentiation. KBTBD10 regulates proliferation and differentiation of myoblasts and plays a role in myofibril assembly by promoting lateral fusion of adjacent thin fibrils into mature, wide myofibrils.
