For Research Use Only

ING4 Monoclonal antibody

Catalog Number: 60110-1-Ig

Purification Method:

precipitation

CloneNo.:

1F5G10

Caprylic acid/ammonium sulfate

Basic Information

Catalog Number: GenBank Accession Number:

60110-1-lg BC007781 GeneID (NCBI):

150ul , Concentration: 1000 $\mu g/ml$ by 51147 Bradford method using BSA as the **UNIPROT ID:** standard;

Q9UNL4 Source: Full Name:

Mouse inhibitor of growth family, member 4

Isotype: Calculated MW: lgG1 29 kDa Immunogen Catalog Number: Observed MW: AG4610 29 kDa

Applications

Tested Applications:

ELISA

Species Specificity:

human

Background Information

ING4, also named as p29ING4, belongs to the ING family. It is a component of the HBO1 complex which has a histone H4-specific acetyltransferase activity, a reduced activity toward histone H3 and is responsible for the bulk of histone H4 acetylation in vivo. It may inhibit tumor progression by modulating the transcriptional output of $signaling\ pathways\ which\ regulate\ cell\ proliferation.\ ING4\ can\ suppress\ brain\ tumor\ angiogenesis\ through$ $transcriptional\ repression\ of\ RELA/NFKB3\ target\ genes\ when\ complexed\ with\ RELA.\ It\ may\ also\ specifically\ suppress$ loss of contact inhibition elicited by activated oncogenes such as MYC. Represses hypoxia inducible factor's (HIF) activity by interacting with HIF prolyl hydroxylase 2 (EGLN1). ING4 is a tumor suppressor gene that interacts with NFkB and represses its transcriptional activity. Several lines of evidence suggest that the tumor suppressor gene ING4, NFkB and its target genes matrix metalloproteases MMP-2, MMP-9 and u-PA are critically involved in tumor invasion. This antibody is a mouse monoclonal antibody raised against full length human ING4 antigen.

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

PBS with 0.1% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA

Selected Validation Data
