

For Research Use Only

MBP tag Monoclonal antibody

Catalog Number: 66003-1-Ig **39 Publications**

Basic Information

Catalog Number: 66003-1-Ig	GenBank Accession Number: GeneID (NCBI):	Purification Method: Protein A purification
Size: 150ul, Concentration: 2000 µg/ml by Nanodrop;	Full Name:	CloneNo.: 4C6H4
Source: Mouse	Calculated MW: 40 kDa	Recommended Dilutions: WB 1:1000-1:8000 IP 0.5-4.0 µg for IP and 1:5000-1:50000 for WB
Isotype: IgG2a	Observed MW: 40 kDa	
Immunogen Catalog Number: AG0942		

Applications

Tested Applications: IF, IP, WB, ELISA	Positive Controls:
Cited Applications: CoIP, IF, IHC, IP, WB	WB: Recombinant protein,
Species Specificity: recombinant protein	IP: Recombinant protein protein,
Cited Species: human, rat, mouse	

Background Information

Protein tags are protein or peptide sequences located either on the C- or N- terminal of the target protein, which facilitates one or several of the following characteristics: solubility, detection, purification, localization and expression. Maltose binding protein (MBP) is the 370 amino acid product of the E.coli mal E gene. MBP is a useful affinity tag that can increase the expression level and solubility of the resulting tagged protein. The MBP tag also promotes proper folding of the attached protein. Plasmid vectors have been constructed utilizing the MBP domain that allow the synthesis of high levels of MBP-fusion proteins that can be purified in a one step procedure by affinity chromatography cross linked amylose resin. Once bound to amylose, the MBP protein can then be separated from the target protein by cleavage by coagulation Factor Xa at a specific four residue site. Alternatively, the intact fusion protein can be specifically eluted from the resin by the addition of excess free maltose. Subsequent to elution, MBP fusion protein can be visualized either by Western blot analysis or immunoprecipitation using antibodies specific for the MBP-tag. An antibody to MBP can also be used to isolate or detect expression of the protein.

Notable Publications

Author	Pubmed ID	Journal	Application
Song Liu	32908127	Nat Commun	WB
Guizhen Zhao	29089350	Circ Res	WB
Bixin Bai	36380696	Plant J	WB

Storage

Storage:
Store at -20°C. Stable for one year after shipment.
Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol pH 7.3.
Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA
