## VWF Monoclonal antibody

Catalog Number:66682-1-lg 15 Publications

Basic Information	Catalog Number: 66682-1-lg Size: 150ul, Concentration: 1000 ug/ml by Nanodrop and 501 ug/ml by Bradford mathed using BCA as the standard	rutt Name.		Purification Method: Protein G purification CloneNo.: 3F9F3 Recommended Dilutions:	
	method using BSA as the standard; Source: Mouse			IHC 1:250-1:1000 IF-P 1:200-1:800	
	lsotype: lgG1				
	Immunogen Catalog Number: AG25578				
Applications	Tested Applications: IHC, IF-P, ELISA		Positive Controls:		
	Cited Applications: IHC, IF		IHC : human breast cancer tissue, human liver cancer tissue, human prostate cancer tissue, human tonsillitis tissue		
	Species Specificity: human			breast cancer tissue,	
	Cited Species: human, mouse, rat				
	Note-IHC: suggested antigen r TE buffer pH 9.0; (*) Alternativ retrieval may be performed w buffer pH 6.0	vely, antigen			
Background Information	Von Willebrand factor (VWF) is a large multimeric glycoprotein found in blood plasma involved in hemostasis following vascular injury. Due to the multimeric nature of VWF, it can range in size from 500 to 20,000 kDa due to the differences in the number of subunits comprising the protein. Each subunit is approximately 250 kDa (PMID: 9759493). The biosynthesis of VWF in vivo is limited to endothelial cells (PMID: 4209883) and megakaryocytes (PMID: 2413071). VWF synthesized in endothelial cells is either released directly into the plasma via 27186a secretory pathway, or tubulized and stored in organelles unique to this cell type called Weibel-Palade bodies (PMID: 2046403). The primary function of VWF is as an adhesive plasma glycoprotein, particularly factor VIII; an essential blood-clotting protein (PMID: 6982084). VWF is also important in platelet adhesion to wound sites by binding specifically to type I and type III collagen (PMID: 11098050), with larger VWF multimers being most effective (PMID: 24448155).

## Selected Validation Data

Immunohistochemical analysis of paraffinembedded human breast cancer tissue slide using 66682-1-1g (vwf antibody) at dilution of 1:500 (under 10x lens. Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunohistochemical analysis of paraffinembedded human breast cancer tissue slide using 66682-1-1g (vwf antibody) at dilution of 1:500 (under 40x lens. Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunofluorescent analysis of (4% PFA) fixed paraffin-embedded human breast cancer tissue using VWF antibody (66682-1-Ig, Clone: 3F9F3) at dilution of 1:400 and CoraLite®488-Conjugated AffiniPure Goat Anti-Mouse IgG(H+L). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunofluorescent analysis of (4% PFA) fixed paraffin-embedded human breast cancer tissue using VWF antibody (66682-1-1g, Clone: 3F9F3) at dilution of 1:400 and CoraLite@488-Conjugated AffiniPure Goat Anti-Mouse IgG(H+L). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunohistochemical analysis of paraffinembedded human prostate cancer tissue slide using 66682-1-1g (VWF antibody) at dilution of 1:2000 (under 10x lens). Proteolytic pre-treatment mediated antigen retrieval with.
