## HIF2a/EPAS1 Monoclonal antibody

Catalog Number:66731-1-lg 8 Publications

Basic Information	Catalog Number: 66731-1-lg	GenBank Accession Number: BC051338	Purification Method: Protein A purification
	Size:	GenelD (NCBI):	CloneNo.:
	150ul , Concentration: 1600 ug/ml by	2034	2F6B12
	Nanodrop and 1000 ug/ml by Bradford method using BSA as the standard;	<sup>J</sup> UNIPROT ID: Q99814	Recommended Dilutions: WB 1:1000-1:5000 IHC 1:250-1:1000
	Mouse Isotype: IgG2a Immunogen Catalog Number:	Full Name: endothelial PAS domain protein 1	
		Calculated MW: 96 kDa	
		Observed MW: 120 kDa	
Applications	Tested Applications: WB, IHC, ELISA	Positive Controls:	
		WB : HeLa cells, HepG2 cells	
	Cited Applications: WB, IHC, IF	IHC : human colon cancer tissue,	
	Species Specificity: Human		
	Cited Species: human, bovine		
	Note-IHC: suggested antigen re TE buffer pH 9.0; (*) Alternativ retrieval may be performed w buffer pH 6.0	ely, antigen	
	Endothelial PAS domain-containing protein 1 (EPAS1), also known as Hypoxia-inducible factor 2-alpha (HIF2- alpha,HIF2A), is a transcription factor involved in the induction of oxygen regulated genes. Binds to core DNA sequence 5'-[AG]CGTG-3' within the hypoxia response element (HRE) of target gene promoters. Regulates the vascular endothelial growth factor (VEGF) expression and seems to be implicated in the development of blood vessels and the tubular system of lung. May also play a role in the formation of the endothelium that gives rise to the blood brain barrier. Potent activator of the Tie-2 tyrosine kinase expression. Activation seems to require recruitment of transcriptional coactivators such as CREBPB and probably EP300. Interaction with redox regulatory protein APEX seems to activate CTAD. EPAS1 is expressed in most tissues, with highest levels in placenta, lung and heart. Selectively expressed in endothelial cells.		
Background Information	alpha,HIF2A), is a transcription factor sequence 5'-[AG]CGTG-3' within the h vascular endothelial growth factor (VI vessels and the tubular system of lun the blood brain barrier. Potent activat recruitment of transcriptional coactiva protein APEX seems to activate CTAD	ypoxia response element (HRE) of t EGF) expression and seems to be in g. May also play a role in the format or of the Tie-2 tyrosine kinase expr ators such as CREBPB and probably . EPAS1 is expressed in most tissues	regulated genes. Binds to core DNA arget gene promoters. Regulates the uplicated in the development of blood tion of the endothelium that gives rise to ession. Activation seems to require EP300. Interaction with redox regulatory
	alpha,HIF2A), is a transcription factor sequence 5'-[AG]CGTG-3' within the h vascular endothelial growth factor (VI vessels and the tubular system of lung the blood brain barrier. Potent activat recruitment of transcriptional coactiva protein APEX seems to activate CTAD heart. Selectively expressed in endot	ypoxia response element (HRE) of t EGF) expression and seems to be in g. May also play a role in the format or of the Tie-2 tyrosine kinase expra ators such as CREBPB and probably . EPAS1 is expressed in most tissues helial cells.	regulated genes. Binds to core DNA arget gene promoters. Regulates the aplicated in the development of blood tion of the endothelium that gives rise to ession. Activation seems to require EP300. Interaction with redox regulatory s, with highest levels in placenta, lung ar
	alpha,HIF2A), is a transcription factor sequence 5'-[AG]CGTG-3' within the h vascular endothelial growth factor (VI vessels and the tubular system of lung the blood brain barrier. Potent activat recruitment of transcriptional coactiva protein APEX seems to activate CTAD heart. Selectively expressed in endot	ypoxia response element (HRE) of t EGF) expression and seems to be in g. May also play a role in the format or of the Tie-2 tyrosine kinase expr ators such as CREBPB and probably f . EPAS1 is expressed in most tissues helial cells.	regulated genes. Binds to core DNA arget gene promoters. Regulates the applicated in the development of blood tion of the endothelium that gives rise to ession. Activation seems to require EP300. ## Selected Validation Data

untreated and cobalt chloride treated Hela cells were subjected to SDS PACE followed by western blot with 66731-1-1g (EPAS1 antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours. Immunohistochemical analysis of paraffinembedded human colon cancer tissue slide using 66731-1-Ig (EPAS1 antibody) at dilution of 1:500 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).
