

For Research Use Only

WFS1 Monoclonal antibody

Catalog Number: 67291-1-Ig

Basic Information

Catalog Number: 67291-1-Ig	GenBank Accession Number: BC030130	Purification Method: Protein A purification
Size: 150ul , Concentration: 1000 µg/ml by Bradford method using BSA as the standard;	GeneID (NCBI): 7466	CloneNo.: 4C2B5
Source: Mouse	Full Name: Wolfram syndrome 1 (wolframin)	Recommended Dilutions: WB 1:1000-1:5000
Isotype: IgG1	Calculated MW: 890 aa, 100 kDa	
Immunogen Catalog Number: AG25735	Observed MW: 100 kDa	

Applications

Tested Applications: WB,ELISA	Positive Controls: WB : HeLa cells, Neuro-2a cells, PC-12 cells, SH-SY5Y cells, U-251 cells, HEK-293 cells, C6 cells
Species Specificity: Human, mouse, rat, pig	

Background Information

Wolfram syndrome protein (WFS1), also called wolframin, is a transmembrane protein, which is located primarily in the endoplasmic reticulum and its expression is induced in response to ER stress, partially through transcriptional activation. ER localization suggests that WFS1 protein has physiological functions in membrane trafficking, secretion, processing and/or regulation of ER calcium homeostasis. It is ubiquitously expressed with highest levels in brain, pancreas, heart, and insulinoma beta-cell lines. Mutations of the WFS1 gene are responsible for two hereditary diseases, autosomal recessive Wolfram syndrome and autosomal dominant low frequency sensorineural hearing loss.

Storage

Storage:
Store at -20°C.
Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol pH 7.3.
Aliquoting is unnecessary for -20°C storage

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 67291-1-Ig (WFS1 antibody) at dilution of 1:3000 incubated at room temperature for 1.5 hours.
