

CoraLite® Plus 488-conjugated TGF beta 1 Monoclonal antibody

Catalog Number: **CL488-69012**

Basic Information

Catalog Number:

CL488-69012

GenBank Accession Number:

GeneID (NCBI):

7040

Purification Method:

Protein G purification

Size:

100ul , Concentration: 1000 µg/ml by Nanodrop;

Full Name:

transforming growth factor, beta 1

CloneNo.:

1E3E9

Source:

Mouse

Excitation/Emission maxima wavelengths:

493 nm / 522 nm

Isotype:

IgG1

Immunogen Catalog Number:

HZ-1011

Applications

Tested Applications:

Species Specificity:

Human

Background Information

TGFB, also named as LAP and TGFB1, is a multifunctional peptide that controls proliferation, differentiation, and other functions in many cell types. TGFB acts synergistically with TGFA in inducing transformation. It also acts as a negative autocrine growth factor. Dysregulation of TGFB activation and signaling may result in apoptosis. Many cells synthesize TGFB and almost all of them have specific receptors for it. TGFB positively and negatively regulates many other growth factors. It plays an important role in bone remodeling as it is a potent stimulator of osteoblastic bone formation, causing chemotaxis, proliferation and differentiation in committed osteoblasts. It is highly expressed in bone. Mutation of TGFB are the cause of Camurati-Engelmann disease (CED) which known as progressive diaphyseal dysplasia 1 (DPD1).

Storage

Storage:

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage
