## For Research Use Only

## CoraLite® Plus 555 Anti-Human ALCAM (3A6)

Catalog Number: CL555-65223

**Basic Information** 

Catalog Number:

CL555-65223

Size:

100tests , 5 µl/test

Source: Mouse Isotype:

lgG1, kappa

Q13740 Full Name:

BC057809

214

GeneID (NCBI):

**UNIPROT ID:** 

activated leukocyte cell adhesion molecule

GenBank Accession Number:

Calculated MW: 105 kDa

**Purification Method:** 

Affinity purification

CloneNo.: 3A6

Excitation/Emission maxima wavelengths:

554 nm / 570 nm

**Applications** 

**Tested Applications:** 

Species Specificity:

Human

## **Background Information**

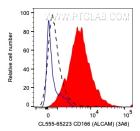

Activated leukocyte cell adhesion molecule (ALCAM, also known as CD166) is a cell adhesion molecule that belongs to the immunoglobulin superfamily. It is involved in cell-cell adhesion through homophilic and heterophilic (to CD6) interactions. ALCAM is widely expressed in a variety of normal tissues and cell types, including activated T cells and monocytes, epithelial cells, fibroblasts, neuronal cells, hepatocytes, and bone marrow mesenchymal stem cells (PMID: 7760007; 25221999). Altered ALCAM expression has been associated with the differentiation state and progression in some neoplasms including melanoma, prostate, colorectal, and breast cancers (PMID: 20461761; 18172759).

Storage

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 0.09% sodium azide and 0.5% BSA.

## Selected Validation Data

1X10^6 PHA-treated (day 3) human PBMCs were surface stained with 5 ul CoraLite® Plus 555 Anti-Human ALCAM (CL555-65223, Clone:3A6) (red), or unstained (blue). The black dashed line indicates unactivated PBMCs surface stained with 5 ul CoraLite® Plus 555 Anti-Human ALCAM (CL555-65223, Clone:3A6). Cells were not fixed. Monocytes were gated.
