For Research Use Only

CoraLite®647-conjugated IGF2R-Specific Polyclonal antibody

Catalog Number: CL647-20253

Basic Information

Catalog Number: GenBank Accession Number:

100ul , Concentration: 1000 µg/ml by 3482 Nanodrop; Full Name:

Source: insulin-like growth factor 2 receptor

Rabbit Calculated MW:

Isotype: 274 kDa

IgG Observed MW:
300 kDa

Purification Method:

Antigen affinity purification Excitation/Emission maxima

wavelengths: 650 nm/665 nm

Applications

Tested Applications:

FC

Species Specificity:

human

Background Information

IGF2R, also named as MPRI, CI Man-6-P receptor, CI-MPR, M6PR, IGF-II receptor, M6P/IGF2R, MPR 300 and CD222, belongs to the MRL1/IGF2R family. IGF2R transports of phosphorylated lysosomal enzymes from the Golgi complex and the cell surface to lysosomes. IGF2R is a lysosomal enzymes bearing phosphomannosyl residues bind specifically to mannose-6-phosphate receptors in the Golgi apparatus and the resulting receptor-ligand complex is transported to an acidic prelyosomal compartment where the low pH mediates the dissociation of the complex. This receptor also binds IGF2. IGF2R acts as a positive regulator of T-cell coactivation, by binding DPP4. The antibody is specific to IGF2R.

Storage

Storage:

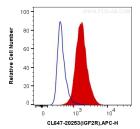

Store at -20°C. Avoid exposure to light.

Storage Buffer:

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

1X10^6 HepG2 cells were intracellularly stained with 0.2 ug Coralite®647 Anti-Human IGF2R-Specific (CL647-20253) (red), or 0.2 ug Control Antibody. Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer.
