For Research Use Only

CoraLite® Plus 750 Anti-Human ALCAM (3A6)

Catalog Number: CL750-65223

Catalog Number: GenBank Accession Number: **Purification Method: Basic Information** CL750-65223 Affinity purification

> GeneID (NCBI): CloneNo.: Size: 100tests , 5 µl/test 3A6 214

Source: **UNIPROT ID:** Recommended Dilutions: FC: 5 ul per 10^6 cells in $100 \mu l$ Mouse Q13740

suspension Isotype: Full Name:

lgG1, kappa activated leukocyte cell adhesion Excitation/Emission maxima wavelengths: molecule

755 nm / 780 nm Calculated MW:

105 kDa

Applications Tested Applications: Positive Controls:

Species Specificity:

Human

FC: PHA treated human PBMCs,

Background Information

Activated leukocyte cell adhesion molecule (ALCAM, also known as CD166) is a cell adhesion molecule that belongs to the immunoglobulin superfamily. It is involved in cell-cell adhesion through homophilic and heterophilic (to CD6) interactions. ALCAM is widely expressed in a variety of normal tissues and cell types, including activated T cells and monocytes, epithelial cells, fibroblasts, neuronal cells, hepatocytes, and bone marrow mesenchymal stem cells (PMID: 7760007; 25221999). Altered ALCAM expression has been associated with the differentiation state and progression in some neoplasms including melanoma, prostate, colorectal, and breast cancers (PMID: 20461761; 18172759).

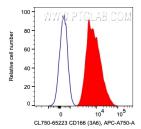

Storage

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 0.09% sodium azide and 0.5% BSA, pH7.3

in USA), or 1(312) 455-8498 (outside USA)

Selected Validation Data

1X10^6 PHA activated human PBMCs were surface stained with 5 ul CoraLite® Plus 750 Anti-Human ALCAM (CL750-65223, Clone:3A6). Cells were not fixed. Monocytes were gated.
