RB1 Polyklonaler Antikörper

Katalog-Nr.: 10048-2-Ig

Vorgestelltes Produkt

48 Publikationen

Allgemeine Informationen

Katalog-Nr.:	10048-2-Ig	GenBank-Zugangsnummer:	BC040540	Reinigungsmethode:
Größe:	150ul, Konzentration: 1200 µg/ml von 5925	GenID (NCBI):		Protein-A-Reinigung
Nanodrop:		Vollständiger Name:	retinoblastoma 1	Empfohlene Verdünnungen:
Wirz:	Kaninchen	Berechneté Masse:	110 kDa	WB 1:5000-1:50000
Isotyp:	IgG	Beobachteté Masse:	110 kDa	IP 0.5-4.0 ug für IP und 1:500-1:1000 für WB
Immunogen Katalognummer:	AG0006			

Anwendungen

Geprüfte Anwendungen:	IP, WB, ELISA	Positivkontrollen:
In Publikationen genannte Anwendungen:	ColP, IF, IHC, WB	WB : A431-Zellen, Jurkat-Zellen, MCF-7-Zellen
Getestete Reaktivität:	Human	IP : A431-Zellen,
Zitierte Arten:	Human, Zebrafisch	

Hintergrundinformationen

RB1, also named as pp110, pRb and p105 Rb, belongs to the retinoblastoma protein (RB) family. It is a key regulator of entry into cell division that acts as a tumor suppressor. RB1 acts as a transcription repressor of E2F1 target genes. The underphosphorylated, active form of RB1 interacts with E2F1 and represses its transcription activity, leading to cell cycle arrest. It is directly involved in heterochromatin formation by maintaining overall chromatin structure and, in particular, that of constitutive heterochromatin by stabilizing histone methylation. It recruits and targets histone methyltransferases SUV39H1, SUV420H1 and SUV420H2, leading to epigenetic transcriptional repression. RB1 controls histone H4 'Lys-20' trimethylation and inhibits the intrinsic kinase activity of TAF1. It mediates transcriptional repression by SMARCA4/BRG1 by recruiting a histone deacetylase (HDAC) complex to the c-FOS promoter. In resting neurons, transcription of the c-FOS promoter is inhibited by BRG1-dependent recruitment of a phospho-RB1-HDAC1 repressor complex. Upon calcium influx, RB1 is dephosphorylated by calcineurin, which leads to release of the repressor complex. In case of viral infections, interactions with SV40 large T antigen, HPV E7 protein or adenovirus E1A protein induce the disassembly of RB1-E2F1 complex thereby disrupting RB1's activity. This antibody is a rabbit polyclonal antibody raised against human RB1 fusion protein.

Lagerung

Lagerungsbedingungen:

Bei -20°C lagern. Nach dem Versand ein Jahr lang stabil

Lagerungspuffer:

PBS mit 0.02% Natriumazid und 50% Glycerin pH 7.3.

Aliquotieren ist nicht notwendig bei -20°C Lagerung

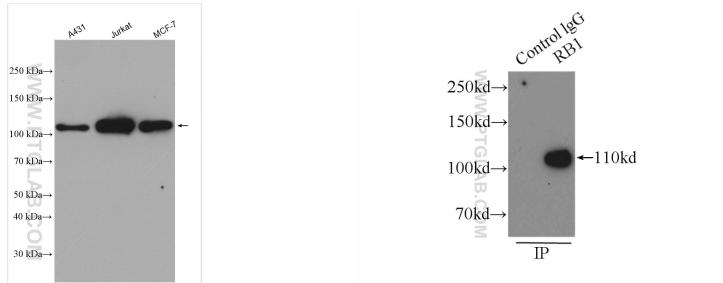

*** 20ul-Größen enthalten 0.1% BSA

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Ausgewählte Validierungsdaten

A431 cells were subjected to SDS PAGE followed by western blot with 10048-2-Ig (RB1 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours.

IP result of anti-RB1 (IP:10048-2-Ig, 3ug; Detection:10048-2-Ig 1:500) with A431 cells lysate 3000 ug.
