

# NeutraControl SCF Monoklonaler Antikörper

Katalog-Nr.: 69530-1-Ig

## Allgemeine Informationen

Katalog-Nr.:	GenBank-Zugangsnummer:
69530-1-Ig	GenID (NCBI):
Größe:	4254
100ug, Konzentration: 1000 µg/ml von Nanodrop;	Vollständiger Name:
	KIT ligand
Wirt:	
Maus	
Isotyp:	
IgG1	
Immunogen Katalognummer:	
HZ-1024	

## Anwendungen

Geprüfte Anwendungen:  
Non-Neutralization, ELISA

Getestete Reaktivität:  
Human

## Hintergrundinformationen

Stem cell factor (SCF) also known as mast cell growth factor, steel factor, and kit ligand, is a hematopoietic growth factor. SCF is a critical protein with key roles in the cell such as hematopoiesis, gametogenesis and melanogenesis. SCF activates multiple signal pathways by binding with c-kit receptor. SCF and its receptor, c-kit ligand (KL), are up-regulated in particular human malignancies including gastrointestinal stromal tumor (GISTS), breast cancer, hematopoietic cell, myeloid leukaemia, and glioma. The SCF/c-KIT system also plays a relevant role in cell fate decision, and its activity is widely known to control cell proliferation, differentiation, survival and apoptosis.

This antibody is a neutralizing control antibody for SCF, the immunogen is the same as Neutrakine 69030-1-Ig but could not neutralize human SCF.

## Lagerung

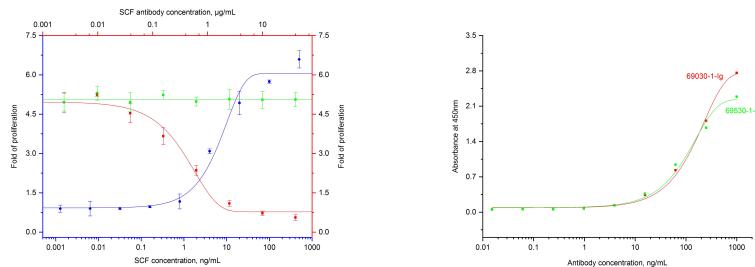

Lagerungsbedingungen:  
Lyophilisierte Antikörper sind bei Lagerung zwischen (-20°C) und (-80°C) 1 Jahr ab Empfangsdatum stabil. Bei Rekonstitution empfehlen wir, die Lösung kurzfristig bei (4°C) oder langfristig bei (-20°C) bis (-80°C). Rekonstituierte Produkte sollten nicht wiederholt eingefroren und wieder aufgetaut werden.

Lagerungspuffer:  
Sterile PBS.

Aliquotieren ist nicht notwendig bei -20°C lagerung

\*\*\* 20ul-Größen enthalten 0.1% BSA

## Ausgewählte Validierungsdaten

Recombinant human SCF (Cat.NO. HZ-1024) stimulates proliferation of the MO7e human megakaryoblastic leukemia cell line in a dose-dependent manner (blue curve, refer to bottom X-left Y). The activity of human SCF (30 ng/mL HZ-1024) is neutralized by mouse anti-human SCF monoclonal antibody 69030-1-Ig at serial dose (red curve, refer to top X-right Y). The ND<sub>50</sub> is typically 0.2-1.0 µg/mL. The NeutraControl mouse anti-human SCF monoclonal antibody 69530-1-Ig could

Indirect ELISA was carried out by coating recombinant Human SCF (Cat.NO. HZ-1024) at 70 ng/well followed by blocking and adding serial diluted SCF antibody 69030-1-Ig and 69530-1-Ig respectively. Signal was developed with TMB and stopped by H<sub>2</sub>SO<sub>4</sub>. Signal strength was measured by absorbance at 450 nm.
