

Nur für Forschungszwecke

Phospho-p70(S6K) (Thr229) Rekombinanter Antikörper

Katalog-Nr.: 81592-1-RR

Allgemeine Informationen

Katalog-Nr.:	81592-1-RR	GenBank-Zugangsnummer:	BC053365	Reinigungsmethode:	Protein-A-Reinigung
Größe:	100ul, Konzentration: 1000 µg/ml von 6198	GenID (NCBI):	6198	CloneNo.:	2G19
Nanodrop:		Vollständiger Name:	ribosomal protein S6 kinase, 70kDa, polypeptide 1	Empfohlene Verdünnungen:	WB 1:5000-1:50000
Wirz:	Kaninchen	Berechneté Masse:	59 kDa		
Isotyp:	IgG	Beobachteté Masse:	65-85 kDa		

Anwendungen

Geprüfte Anwendungen:	Positivkontrollen:
WB, ELISA	WB: Mit IGF-1 behandelte MCF-7-Zellen,
Getestete Reaktivität:	

Human

Hintergrundinformationen

RPS6KB1(Ribosomal protein S6 kinase beta-1) is also named as STK14A, p70S6KA, and belongs to the S6 kinase subfamily. RPS6KB1 is a major substrate of mTOR and acts as a crucial effector of mTOR signaling pathway. It plays a key role in cell growth and proliferation by regulating INS sensitivity, metabolism, protein synthesis, and cell cycle. RPS6KB1 may play an important role in the progression of HCC and could serve as a potential molecular target for HCC therapy (PMID:22684641). The Rps6kb1 gene encodes the 70 kDa ribosomal protein S6 kinase (p70S6K). The PI3K/mTOR signalling pathway is one of the major mechanisms for controlling cell survival, proliferation, and metabolism and is the central regulator of translation of some components of the protein synthesis system. Due to alternative translation, two isoform S6K1 proteins are known to exist in mammalian cells: p85 S6K1 and p70 S6K1, which is identical to p85 S6K but lacks its first 23 amino acids. In addition, mammalian cells express a second S6K1 isoform spanning 316 amino acids (p31 S6K1).

Lagerung

Lagerungsbedingungen:
Bei -20°C lagern. Nach dem Versand ein Jahr lang stabil
Lagerungspuffer:
PBS mit 0.02% Natriumazid und 50% Glycerin pH 7.3.
Aliquotieren ist nicht notwendig bei -20°C Lagerung

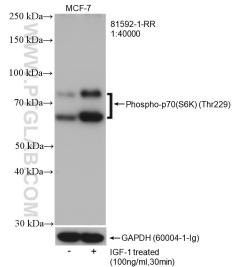

*** 20ul-Größen enthalten 0.1% BSA

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Ausgewählte Validierungsdaten

Non-treated and IGF-1 treated MCF-7 cells were subjected to SDS PAGE followed by western blot with 81592-1-RR (Phosho-p70(S6K) (Thr229) antibody) at dilution of 1:40000 incubated at room temperature for 1.5 hours. The membrane was stripped and rebotted with 60004-1-Ig (GAPDH antibody) as loading control.
