ALCAM Monoklonaler Antikörper

Katalog-Nr.:CL555-65223

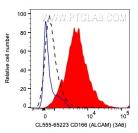

Allgemeine Informationen	Katalog-Nr.: CL555-65223	GenBank-Zugangsnummer: BC057809	Reinigungsmethode: Affinitätsreinigung
	Größe: 100tests , 5 µl/test	GeneID (NCBI): 214	CloneNo.: 3A6
	Wirt: Maus Isotyp: IgG1, kappa	Vollständiger Name: activated leukocyte cell adhesion molecule Berechneté Masse: 105 kDa	Anregungs-/Emissionsmaxima- Wellenlängen: 554 nm / 570 nm
Getestete Reaktivität: Human			
Hintergrundinformationen	Activated leukocyte cell adhesion molecule (ALCAM, also known as CD166) is a cell adhesion molecule that belongs to the immunoglobulin superfamily. It is involved in cell-cell adhesion through homophilic and heterophilic (to CD6) interactions. ALCAM is widely expressed in a variety of normal tissues and cell types, including activated T cells and monocytes, epithelial cells, fibroblasts, neuronal cells, hepatocytes, and bone marrow mesenchymal stem cells (PMID: 7760007; 25221999). Altered ALCAM expression has been associated with the differentiation state and progression in some neoplasms including melanoma, prostate, colorectal, and breast cancers (PMID: 20461761; 18172759).		
Lagerung	Lagerungsbedingungen: Store at 2-8°C. Avoid exposure Lagerungspuffer: PBS with 0.09% sodium azide a	to light. Stable for one year after shipment. Ind 0.5% BSA.	

For technical support and original validation data for this product please contact:T: 1 (888) 4PTGLAB (1-888-478-4522) (toll freeE: proteintech@ptglab.comin USA), or 1(312) 455-8498 (outside USA)W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Ausgewählte Validierungsdaten

1X10^6 PHA-treated (day 3) human PBMCs were surface stained with 5 ul Coralite® Plus 555 Anti-Human ALCAM (CL555-65223, Clone:3A6) (red), or unstained (blue). The black dashed line indicates unactivated PBMCs surface stained with 5 ul Coralite® Plus 555 Anti-Human ALCAM (CL555-65223, Clone:3A6). Cells were not fixed. Monocytes were gated.
