

Nur für Forschungszwecke

CD154 Monoklonaler Antikörper

Katalog-Nr.:CL647-65129

Allgemeine Informationen

Katalog-Nr.: CL647-65129	GenBank-Zugangsnummer: BC119225	Reinigungsmethode: Affinitätsreinigung
Größe: 100tests , 5 µl/test	GeneID (NCBI): 21947	CloneNo.: MR1
Wirt: Armenian Hamster	Vollständiger Name: CD40 ligand	Anregungs-/Emissionsmaxima-Wellenlängen: 654 nm / 674 nm
Isotyp: IgG		

Anwendungen

Geprüfte Anwendungen:
FC
Getestete Reaktivität:
Maus

Hintergrundinformationen

The CD40 ligand (CD40L, TRAP, CD154), a member of the TNF superfamily of ligands, is expressed as either a 33-kd transmembrane homologue or 18-kd soluble form (sCD154). CD40L is primarily expressed on activated CD4+ T cells and on a small proportion of CD8+ T cells and platelets. It binds to CD40 on antigen-presenting cells (APC), which leads to many effects depending on the target cell type. It has been suggested that CD40/CD40L interactions regulate oxidative stress and affect various signaling pathways in both the immunological and the cardiovascular systems. The CD40/CD40L system is also involved in tumorigenesis. Its expression is tightly regulated, and abnormal levels of CD40L are associated with the pathogenesis of atheromatous plaque destabilization and thrombotic events. Multiple mutations in CD40LG gene have been identified that are associated with hyper-IgM immunodeficiency syndrome type 1.

Lagerung

Lagerungsbedingungen:
Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.
Lagerungspuffer:
PBS mit 0,1% Natriumazid und 0,5% BSA, pH 7,3.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Ausgewählte Validierungsdaten

CD4⁺ T cells sorted from splenocytes, were stimulated with PMA and ionomycin and surface stained with 5 μ l CoraLite® Plus 647 Anti-Mouse CD154 (CL647-65129, Clone: MR1) (blue) or CoraLite® Plus 647 conjugated Armenian Hamster IgG isotype control (black). Cells were not fixed.
