

# TGF beta 1 Monoklonaler Antikörper

Katalog-Nr.: CL647-69012

## Allgemeine Informationen

Katalog-Nr.:	CL647-69012	GenBank-Zugangsnummer:	
Größe:	100ul , Konzentration: 1000 µg/ml von Nanodrop;	GeneID (NCBI):	7040
		Vollständiger Name:	transforming growth factor, beta 1
Wirt:	Maus	Reinigungsmethode:	Protein-G-Reinigung
Isotyp:	IgG1	CloneNo.:	1E3E9
Immunogen Katalognummer:	HZ-1011	Anregungs-/Emissionsmaxima-Wellenlängen:	654 nm / 674 nm

## Anwendungen

### Geprüfte Anwendungen:

FC (Intra)

### Getestete Reaktivität:

Human

## Hintergrundinformationen

TGFB, also named as LAP and TGFB1, is a multifunctional peptide that controls proliferation, differentiation, and other functions in many cell types. TGFB acts synergistically with TGFA in inducing transformation. It also acts as a negative autocrine growth factor. Dysregulation of TGFB activation and signaling may result in apoptosis. Many cells synthesize TGFB and almost all of them have specific receptors for it. TGFB positively and negatively regulates many other growth factors. It plays an important role in bone remodeling as it is a potent stimulator of osteoblastic bone formation, causing chemotaxis, proliferation and differentiation in committed osteoblasts. It is highly expressed in bone. Mutation of TGFB are the cause of Camurati-Engelmann disease (CED) which known as progressive diaphyseal dysplasia 1 (DPD1).

This antibody is used to Block/Neutralize TGF beta 1 protein.

## Lagerung

### Lagerungsbedingungen:

Bei -20°C lagern. Vor Licht schützen.

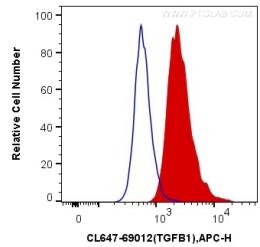

### Lagerungspuffer:

BS mit 50% Glyzerin, 0,05% Proclin300, 0,5% BSA, pH 7,3.

Aliquotieren ist nicht notwendig bei -20°C Lagerung

\*\*\* 20ul-Größen enthalten 0.1% BSA

## Ausgewählte Validierungsdaten

$1 \times 10^6$  HEK-293 cells were intracellularly stained with 0.4 ug Coralite® Plus 647 Anti-Human TGF beta 1 (CL647-69012, Clone:1E3E9) (red), or 0.4 ug Control Antibody. Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C).
