## Informations générales

OTUB (otubain) 1 is also named as OTB1, OTU1 and belong to the ovarian tumor (OTU) protein superfamily. It is a human deubiquitinating enzyme that is implicated in mediating lymphocyte antigen responsiveness(PMID:18954305). It is also a deubiquitinating enzyme, which is an inhibitor of double stranded break induced chromatin ubiquitination. This protein has 2 isoforms produced by alternative splicing with the 31 kDa( isoform1) and 35 kDa( isoform2). By PCR and immunoblot analysis, the isoform1 is expressed ubiquitously, and isoform2 is expressed only in lymphoid tissue(PMID:14661020).
