Anticorps Polyclonal de lapin anti-CTCF

Numéro de catalogue: 10915-1-AP

3 Publications

Informations de base

Numéro de catalogue:	BC014267	Méthode de purification:
10915-1-AP	Identification du gène (NCBI):	Purification par affinité contre l'antigène
Taille:	10664	Dilutions recommandées:
150ul, Concentration: 400 µg/ml by Nanodrop;	Nom complet:	WB 1:500-1:1000
Hôte:	CCCTC-binding factor (zinc finger protein)	IP 0.5-4.0 ug for IP and 1:200-1:1000 for WB
Lapin	MW calculé	IHC 1:20-1:200
Isotype:	83 kDa	IF 1:50-1:500
IgG	MW observés:	
Immunogen Catalog Number:	55-100 kDa, 130-150 kDa	
AG1340		

Applications

Applications testées:	Contrôles positifs:
IF, IHC, IP, WB, ELISA	WB : tissu cérébral humain, cellules 4T1, cellules HEK-293T
Demandes citées:	IP : cellules MCF-7,
ChIP, RIP, WB	IHC : tissu de lymphome humain,
Spécificité de l'espèce:	IF : cellules HepG2,
Humain, souris	
Espèces citées:	
Humain	

Remarque-IHC: il est suggéré de démasquer l'antigène avec un tampon de TE buffer pH 9,0; (*) À défaut, le démasquage de l'antigène peut être effectué avec un tampon citrate pH 6,0.

Informations générales

Transcriptional insulators are DNA elements that set boundaries on the actions of enhancer and silencer elements and thereby organize the eukaryotic genome into regulatory domains. All vertebrate insulators appear to use the versatile CTCF protein. CTCF uses various combinations of its 11 zinc fingers to recognize a variety of unrelated DNA sequences. Once bound to DNA, CTCF can function as a transcriptional insulator, repressor, or activator, depending on the context of the binding site [PMID:12787766,15454938]. In vertebrates, this 11 zinc-finger protein is shown to be crucial in processes of epigenetic imprinting, X chromosome inactivation, and associated with various complex human diseases including cancer and diabetes [PMID:23139640]. The calculated molecular weight of CTCF is 83 kDa, but stimulation of human corneal epithelial cells with hypoxic stress suppressed a high molecular mass form of CTCF (150 kDa), but not a lower molecular weight form of CTCF (130 kDa) [PMID: 22354964], and there are multiple isoforms of CTCF with molecular masses of 55, 70, 73, 80, 97, and 130 kDa have been observed (PMID: 12878173).

Publications notables

Autrice	Pubmed ID	Journal	Application

Stockage

Stockage:

Stocker à -20°C. Stable pendant un an après l'expédition.

Tampon de stockage:

PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3

L'aliquotage n'est pas nécessaire pour le stockage à -20°C

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

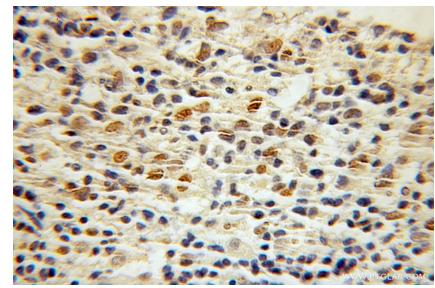

Données de validation sélectionnées

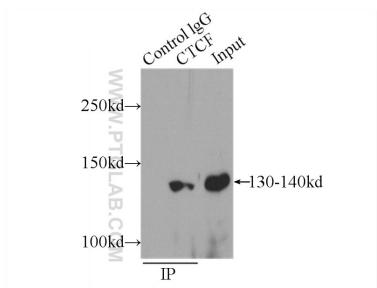

Immunofluorescent analysis of (4% PFA) fixed HepG2 cells using 10915-1-AP (CTCF antibody), at dilution of 1:200 and Coralite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L).

human brain tissue were subjected to SDS PAGE followed by western blot with 10915-1-AP (CTCF antibody) at dilution of 1:500 incubated at room temperature for 1.5 hours.

Immunohistochemical analysis of paraffin-embedded human lymphoma using 10915-1-AP (CTCF antibody) at dilution of 1:100 (under 10x lens).

IP Result of anti-CTCF (IP:10915-1-AP, 5ug; Detection:10915-1-AP 1:300) with MCF-7 cells lysate 2560ug.
