9 Publications

Informations de base

Numéro de catalogue:	BC011704	Méthode de purification:
11009-1-AP		Purification par affinité contre l'antigène
Taille:	Identification du gène (NCBI):	Dilutions recommandées:
150ul , Concentration: 350 µg/ml by Nanodrop;	4192	WB 1:500-1:1000
Hôte:	Nom complet:	
Lapin	midkine (neurite growth-promoting factor 2)	
Isotype:	MW calculé	
IgG	16 kDa	
Immunogen Catalog Number:	MW observés:	
AG1465	16 kDa	

Applications

Applications testées:	Contrôles positifs:
WB, ELISA	WB : tissu embryonnaire de souris, cellules COLO 320, cellules SH-SY5Y
Demandes citées:	
IF, IHC, WB	
Spécificité de l'espèce:	
Humain, souris	
Espèces citées:	
Humain, rat, souris	

Informations générales

Midkine is a heparin-binding growth factor identified over 20 years ago and enhances the survival, migration and many other activities of target cells. Midkine is rich in both basic amino acids and cysteine, and is not related to most other growth factors/cytokines. It is strongly expressed during embryonic periods, especially at the midgestation stage, and plays important roles in development, especially in neurogenesis. Midkine expression in adult tissue is generally weak or undetectable, and it is induced upon injury and exerts many activities related to tissue repair. The biological activities of midkine in malignant tumors include proliferation, angiogenesis, invasion and metastasis. Various cancers express significantly higher levels of the midkine protein in early stage tumor tissues than in adjacent normal tissue.

Stockage

Stockage:

Stocker à -20°C. Stable pendant un an après l'expédition.

Tampon de stockage:

PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3

L'aliquotage n'est pas nécessaire pour le stockage à -20C

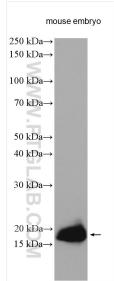

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

Mouse embryo tissue were subjected to SDS PAGE followed by western blot with 11009-1-AP (Midkine antibody) at dilution of 1:800 incubated at room temperature for 1.5 hours.
