Informations de base

Numéro de catalogue:	BC011519	Méthode de purification:
11992-1-AP	Purification par affinité contre l'antigène	
Taille:	Identification du gène (NCBI):	Dilutions recommandées:
150ul, Concentration: 430 µg/ml by Nanodrop;	183	WB 1:1000-1:4000
Hôte:	Nom complet:	IHC 1:50-1:500
Lapin	angiotensinogen (serpin peptidase inhibitor, clade A, member 8)	
Isotype:	MW calculé	
IgG	485 aa, 53 kDa	
Immunogen Catalog Number:	MW observés:	
AG2632	53 kDa	

Applications

Applications testées:	Contrôles positifs:
FC, IHC, WB, ELISA	WB: cellules HuH-7, cellules HepG2, plasma humain
Demandes citées:	IHC : tissu hépatique humain,
IF, IHC, WB	
Spécificité de l'espèce:	
Humain	
Espèces citées:	
Humain, rat, souris	
Remarque-IHC: il est suggéré de démasquer l'antigène avec un tampon de TE buffer pH 9,0; (*) À défaut, le démasquage de l'antigène peut être effectué avec un tampon citrate pH 6,0.	

Informations générales

Angiotensinogen is a precursor of angiotensin II (Ang II), is expressed and synthesized largely in the liver and is cleaved by the enzyme renin in response to lowered blood pressure. It has a key role in mediating vascular constriction and regulating salt and fluid homeostasis. The resulting product, angiotensin I, is then cleaved by angiotensin converting enzyme (ACE) to generate the physiologically active enzyme angiotensin II. Mutations in this gene are associated with susceptibility to essential hypertension, and can cause renal tubular dysgenesis, a severe disorder of renal tubular development. Defects in this gene also have been associated with non-familial structural atrial fibrillation, and inflammatory bowel disease.

Stockage

Stockage:

Stocker à -20°C. Stable pendant un an après l'expédition.

Tampon de stockage:

PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3

L'aliquotage n'est pas nécessaire pour le stockage à -20C

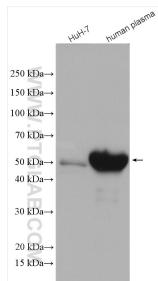

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

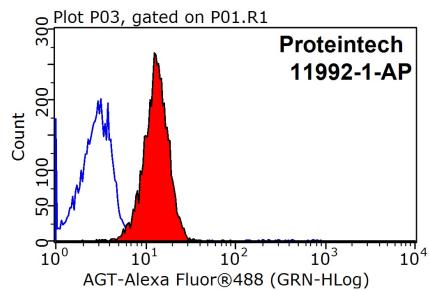

Various lysates were subjected to SDS PAGE followed by western blot with 11992-1-AP (Angiotensinogen antibody) at dilution of 1:2000 incubated at room temperature for 1.5 hours.

Immunohistochemical analysis of paraffin-embedded human liver tissue slide using 11992-1-AP (Angiotensinogen antibody) at dilution of 1:200 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunohistochemical analysis of paraffin-embedded human liver tissue slide using 11992-1-AP (Angiotensinogen antibody) at dilution of 1:200 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

1×10^6 HeLa cells were stained with 0.2ug Angiotensinogen antibody (11992-1-AP, red) and control antibody (blue). Fixed with 90% MeOH blocked with 3% BSA (30 min). Alexa Fluor 488-conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) with dilution 1:1500.
