Anticorps Polyclonal de lapin anti-MLLT3/AF9

Numéro de catalogue: **12825-1-AP**

Informations de base

Numéro de catalogue:	BC036089	Méthode de purification:
12825-1-AP		Purification par affinité contre l'antigène
Taille:	4300	Dilutions recommandées:
150ul , Concentration: 500 µg/ml by Nanodrop and 400 µg/ml by Bradford method using BSA as the standard;		WB 1:500-1:1000
Hôte:	myeloid/lymphoid or mixed-lineage leukemia (trithorax homolog, Drosophila); translocated to, 3	
Lapin		
Isotype:	MW calculé	
IgG	568 aa, 63 kDa	
Immunogen Catalog Number:	MW observés:	
AG3528	63-70 kDa	

Applications

Applications testées:	Contrôles positifs:
WB, ELISA	WB : cellules Jurkat, cellules HL-60
Spécificité de l'espèce:	
Humain, rat, souris	

Informations générales

MLLT3, also named as AF9, YEATS3, is a 568 amino acid protein, which is a component of the superelongation complex6 and co-operates with DOT1L, which di/trimethylates H3K79 to promote transcription. MLLT3 localizes to active transcription start sites (TSSs) through the YEATS domain, which recognizes active histone marks such as H3K9 acetylation and crotonylation. A truncated MLLT3 that lacks the YEATS domain forms a leukaemic fusion protein with the N terminus of MLL1, which misdirects MLLT3-interacting complexes to induce aberrant gene transcription. MLLT3 also regulates erythroid or megakaryocytic progenitors and was identified as a definitive HSC hub gene during mouse development. Researcher found that the expression of a gene called MLLT3 was closely correlated with blood stem cells' potential to self-renew and that the protein generated by the MLLT3 gene provides blood stem cells with the instructions necessary to maintain its ability to self-renew. It does this by working with other regulatory proteins to keep important parts of the blood stem cell's machinery operational as the cells divide.

Stockage

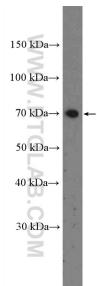

Stockage:
Stocker à -20°C. Stable pendant un an après l'expédition.
Tampon de stockage:
PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3
L'aliquotage n'est pas nécessaire pour le stockage à -20C

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

Jurkat cells were subjected to SDS PAGE followed by western blot with 12825-1-AP (MLLT3/AF9 antibody at dilution of 1:600 incubated at room temperature for 1.5 hours.
