## Informations générales

SNTA1, also known as Syntrophin 1, SNT1, is cytoplasmic peripheral membrane scaffold proteins that are components of the dystrophin-associated protein complex. SNTA1 is a signal-transducing adaptor protein and serves as a scaffold for various signaling molecules. Alpha-1 syntrophin contains a PDZ domain, two Pleckstrin homology domains, and a 'syntrophin unique' domain. SNTA1 is the high expression in skeletal muscle and heart (PMID: 8576247, 8612778,). The PDZ domain of SNTA1 has been reported to bind to the C-terminal domain of murine cardiac voltage-gated sodium channels (SkM2) causing altering ion channel activity leading to Long QT syndrome (PMID 19684871, 19862833).

## Données de validation sélectionnées

Various lysates were subjected to SDS PAGE followed by western blot with 13131-1-AP (SNTA1 antibody) at dilution of 1:1500 incubated at room temperature for 1.5 hours.

Immunohistochemical analysis of paraffin-embedded mouse heart tissue slide using 13131-1-AP (SNTA1 antibody) at dilution of 1:200 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).
