# Anticorps Polyclonal de lapin anti-NANOG

Numéro de catalogue: 14295-1-AP

Phare

183 Publications

## Informations de base

Numéro de catalogue:	BC160187	Méthode de purification:
14295-1-AP		Purification par affinité contre l'antigène
Taille:	Identification du gène (NCBI):	Dilutions recommandées:
150ul , Concentration: 750 µg/ml by Nanodrop;	79923	WB 1:500-1:3000 IF 1:20-1:200
Hôte:	Nom complet:	
Lapin	Nanog homeobox	
Isotype:	MW calculé	
IgG	35 kDa	
Immunogen Catalog Number:	MW observés:	
AG5645	35-40 kDa	

## Applications

Applications testées:	Contrôles positifs:
FC, IF, WB, ELISA	WB : cellules NCCIT, tissu cérébral de rat, tissu cérébral de souris, tissu embryonnaire de souris
Demandes citées:	IF : cellules souches embryonnaires humaines,
IF, IHC, WB	
Spécificité de l'espèce:	
Humain, rat, souris	
Espèces citées:	
Humain, porc, rat, souris	

## Informations générales

Nanog is a member of the homeobox family of DNA binding transcription factors and has been shown to maintain embryonic stem (ES) cell self-renewal independently of leukemia inhibitory factor (LIF)/Stat3. Nanog mRNA is present in pluripotent mouse and human cell lines, and absent from differentiated cells. Functionally, Nanog works together with other key pluripotent factors (Oct4, Sox2, and Lin28) to reprogram human fibroblasts and generate induced pluripotent stem (iPS) cells. These key factors form a regulatory network to support or limit each other's expression level, which maintains the properties of ES cells. Affinity purified rabbit anti-Nanog can be used to demonstrate pluripotency of ES and iPS cells. There are two kinds of variants could recognized by NANOG, one is normal form (~39kd), the other is post-translation modified form (~48kd) (21136380). Nanog exists two isoforms with molecular weight 34.4 kDa and 31.9 kDa. (PMID: 21969378)

## Publications notables

## Stockage

### Stockage:

Stocker à -20°C. Stable pendant un an après l'expédition.

### Tampon de stockage:

PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3

L'aliquotage n'est pas nécessaire pour le stockage à -20C

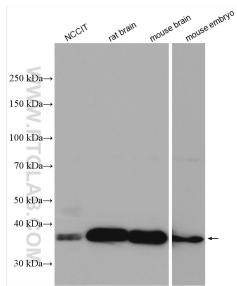

\*\*\* Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

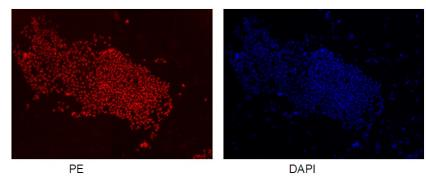

## Données de validation sélectionnées

Various lysates were subjected to SDS PAGE followed by western blot with 14295-1-AP (NANOG antibody) at dilution of 1:1500 incubated at room temperature for 1.5 hours.

$1 \times 10^6$  NCCIT cells were intracellularly stained with 0.2 ug Anti-Human NANOG (14295-1-AP) and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) at dilution 1:1000 (green), and 0.2 ug Control Antibody. Cells were fixed with 90% MeOH.

Confocal immunofluorescent analysis of human embryonic stem cells with 14295-1-AP at dilution of 1:200. The PE shows staining with 14295-1-AP/PE. The DAPI shows nuclear staining by DAPI.
