

À des fins de recherche uniquement

Anticorps Polyclonal de lapin anti-NFKB2,p100-specific

Numéro de catalogue:[15504-1-AP](#)

Informations de base

Numéro de catalogue:	Numéro d'acquisition GenBank:	Méthode de purification:
15504-1-AP	BC002844	Purification par affinité contre l'antigène
Taille:	Identification du gène (NCBI):	
150ul , Concentration: 227 µg/ml by Bradford method using BSA as the standard;	4791	
Hôte:	Nom complet:	
Lapin	nuclear factor of kappa light polypeptide gene enhancer in B-cells 2 (p49/p100)	
Isotype:	MW calculé	
IgG	97 kDa	

Applications

Applications testées:
ELISA

Spécificité de l'espèce:
Humain, rat, souris

Informations générales

NF-kappa-B is a pleiotropic transcription factor which is present in almost all cell types and is involved in many biological processes such as inflammation, immunity, differentiation, cell growth, tumorigenesis and apoptosis. NF-kappa-B is a homo- or heterodimeric complex formed by the Rel-like domain-containing proteins RELA/p65, RELB, NFKB1/p105, NFKB1/p50, REL and NFKB2/p52. NFKB2 appears to have dual functions such as cytoplasmic retention of attached NF-kappa-B proteins by p100 and generation of p52 by a cotranslational processing. The proteasome-mediated process ensures the production of both p52 and p100 and preserves their independent function. P52 binds to the kappa-B consensus sequence 5'-GGRNNYYCC-3', located in the enhancer region of genes involved in immune response and acute phase reactions. P52 and p100 are respectively the minor and major form; the processing of p100 being relatively poor. Isoform p49 is a subunit of the NF-kappa-B protein complex, which stimulates the HIV enhancer in synergy with p65. This antibody can bind p100 isoform of NFKB2 specifically, but not p52 isoform.

Stockage

Stockage:
Stocker à -20°C. Stable pendant un an après l'expédition.
Tampon de stockage:
PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3
L'aliquotage n'est pas nécessaire pour le stockage à -20C

*** Les 20ul contiennent 0,1% de BSA.
