Anticorps Polyclonal de lapin anti-GCK

Numéro de catalogue: 15629-1-AP

Phare

2 Publications

Informations de base

Numéro de catalogue:	BC001890	Méthode de purification:
15629-1-AP		Purification par affinité contre l'antigène
Taille:	2645	Dilutions recommandées:
150ul , Concentration: 550 µg/ml by Nanodrop and 333 µg/ml by Bradford method using BSA as the standard;	glucokinase (hexokinase 4)	WB 1:1000-1:6000
Hôte:	MW calculé	IP 0.5-4.0 ug for IP and 1:500-1:1000 for WB
Lapin	52 kDa	IHC 1:50-1:500
Isotype:	MW observés:	
IgG	52 kDa	
Immunogen Catalog Number:		
AG7904		

Applications

Applications testées:	Contrôles positifs:
IHC, IP, WB, ELISA	WB : tissu hépatique de souris, tissu hépatique de porc, tissu hépatique de rat
Demandes citées:	IP : tissu hépatique de souris,
WB	IHC : tissu de cancer du foie humain,
Spécificité de l'espèce:	
Humain, porc, rat, souris	
Espèces citées:	
souris	
<i>Remarque-IHC: il est suggéré de démasquer l'antigène avec un tampon de TE buffer pH 9,0; (*) À défaut, 'le démasquage de l'antigène peut être 'effectué avec un tampon citrate pH 6,0.</i>	

Informations générales

Glucokinase (GCK) is a structurally and functionally unique member of hexokinase family. It is expressed only in mammalian liver and pancreatic islet beta cells. Because of its unique functional characteristics, the enzyme plays an important regulatory role in glucose metabolism. The rate of glucose metabolism in liver and pancreas is a function of the activity of the enzyme (PMID:1740341). Moreover, GCK has been found to have relationship with diabetes. Defects in GCK are the cause of maturity-onset diabetes of the young type 2 (MODY2) and familial hyperinsulinemic hypoglycemia type 3 (HHF3). It has 3 isoforms produced by alternative splicing with the same molecular mass of 52 kDa. The westernblotting results of human cells we tested are not well, therefore, we do not recommend it to customers who would like to do WB involved in human.

Stockage

Stockage:

Stocker à -20°C. Stable pendant un an après l'expédition.

Tampon de stockage:

PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3

L'aliquotage n'est pas nécessaire pour le stockage à -20C

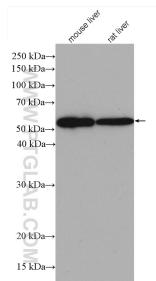

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

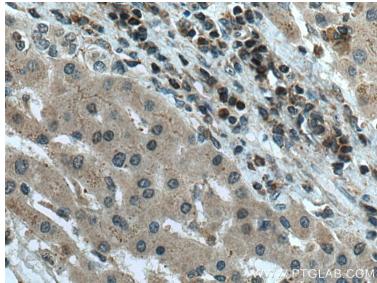

Various lysates were subjected to SDS PAGE followed by western blot with 15629-1-AP (GCK antibody) at dilution of 1:3000 incubated at room temperature for 1.5 hours.

IP Result of anti-GCK (IP:15629-1-AP, 4ug; Detection:15629-1-AP 1:500) with mouse liver tissue lysate 7000ug.

Immunohistochemical analysis of paraffin-embedded human liver cancer tissue slide using 15629-1-AP (GCK antibody) at dilution of 1:200 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunohistochemical analysis of paraffin-embedded human liver cancer tissue slide using 15629-1-AP (GCK antibody) at dilution of 1:200 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).
