Informations générales

RWDD1(RWD domain-containing protein 1) is also named as DFRP2(DRG family-regulatory protein 2) and belongs to the RWDD1/GIR2 family. RWDD1 is a thymus aging-related protein which contains an RWD domain at its N-terminus and it is expressed in both thymocytes and thymic epithelial cells and located primarily in the cytoplasm. This protein expression in thymus is decreased in aged and oxidatively stressed mice (PMID:18954556). RWDD1 has a calculated molecular mass of 28 kDa, and apparent molecular mass of 32-36 kDa due to its high acidic amino acid composition that results in the slowed migration behavior in electrophoresis (PMID: 30278355, 18954556).
