Anticorps Polyclonal de lapin anti-MEF2C-Specific

Numéro de catalogue: **18293-1-AP**

Informations de base

Numéro de catalogue:	Numéro d'acquisition GenBank:	Méthode de purification:
18293-1-AP	NM_002397	Purification par affinité contre l'antigène
Taille:	Identification du gène (NCBI):	Dilutions recommandées:
150ul , Concentration: 213 µg/ml by Nanodrop and 213 µg/ml by Bradford method using BSA as the standard;	4208	WB 1:500-1:1000 IHC 1:20-1:200
Hôte:	Nom complet:	
Lapin	myocyte enhancer factor 2C	
Isotype:	MW calculé	
IgG	51 kDa	
	MW observés:	
	65-68 kDa	

Applications

Applications testées:	Contrôles positifs:
IHC, WB, ELISA	WB : cellules SH-SY5Y,
Spécificité de l'espèce:	IHC : tissu testiculaire humain, tissu cérébral humain, tissu pulmonaire humain, tissu rénal humain, tissu splénique humain
Humain, rat, souris	

Remarque-IHC: il est suggéré de démasquer l'antigène avec un tampon de TE buffer pH 9,0; (*) À défaut, le démasquage de l'antigène peut être effectué avec un tampon citrate pH 6,0.

Informations générales

MEF2C belongs to the MEF2 family. It is a transcription activator which binds specifically to the MEF2 element present in the regulatory regions of many muscle-specific genes. MEF2C controls cardiac morphogenesis and myogenesis, and is also involved in vascular development. It plays an essential role in hippocampal-dependent learning and memory by suppressing the number of excitatory synapses and thus regulating basal and evoked synaptic transmission. It is crucial for normal neuronal development, distribution, and electrical activity in the neocortex and is necessary for proper development of megakaryocytes and platelets and for bone marrow B lymphopoiesis. This protein is required for B-cell survival and proliferation in response to BCR stimulation, efficient IgG1 antibody responses to T-cell-dependent antigens and for normal induction of germinal center B cells. It may also be involved in neurogenesis and in the development of cortical architecture. The immunogen used is peptide from the specific sequence of MEF2C transcript variant 1 match to transcript variant 5. The antibody can recognize the transcript variant 1, transcript variant 2 and transcript variant 3 of MEF2C.

Stockage

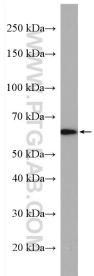

Stockage:
Stocker à -20°C. Stable pendant un an après l'expédition.
Tampon de stockage:
PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3
L'aliquotage n'est pas nécessaire pour le stockage à -20°C

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

SH-SY5Y cells were subjected to SDS PAGE followed by western blot with 18293-1-AP (MEF2C-Specific antibody) at dilution of 1:600 incubated at room temperature for 1.5 hours.

Immunohistochemical analysis of paraffin-embedded human testis using 18293-1-AP (MEF2C-Specific antibody) at dilution of 1:50 (under 10x lens).
