Informations de base

| | | |
|---|--------------------------------|---|
| Numéro de catalogue: | BC000324 | Méthode de purification: |
| 18410-1-AP | | Purification par affinité contre l'antigène |
| Taille: | Identification du gène (NCBI): | Dilutions recommandées: |
| 150ul , Concentration: 850 µg/ml by Nanodrop; | 2896 | WB 1:500-1:1000 |
| Hôte: | Nom complet: | |
| Lapin | granulin | |
| Isotype: | MW calculé | |
| IgG | 64 kDa | |
| Immunogen Catalog Number: | MW observés: | |
| AG13178 | 60-70 kDa | |

Applications

| | |
|--------------------------|--|
| Applications testées: | Contrôles positifs: |
| WB, ELISA | WB : cellules A549, cellules A431, cellules HEK-293, cellules HeLa, cellules PC-3, cellules RAW 264.7, cellules THP-1, cellules U-937, salive humain, salive humaine, tissu cardiaque de souris, tissu cérébral de rat, tissu pulmonaire de souris |
| Demandes citées: | |
| IF, IHC, WB | |
| Spécificité de l'espèce: | |
| Humain, rat, souris | |
| Espèces citées: | |
| Humain, rat, souris | |

Informations générales

GRN, also known as PGRN or PCDGF, is a cysteine-rich protein of 68.5 kDa that is typically secreted into a highly glycosylated 88 kDa form. PGRN is a unique growth factor that plays an important role in cutaneous wound healing. It has an anti-inflammatory effect and promotes cell proliferation. When PCDGF is degraded to several 6-25 kDa fragments, called granulins (GRNs) by neutrophil proteases, a pro-inflammatory reaction occurs. PGRN is widely expressed, particularly in epithelial cells, immune cells, neurons, and chondrocytes. High levels of PGRN expression have been reported in human cancers, and its expression is closely correlated with the development and metastasis of several cancers. The recent discovery that mutations in the gene encoding for pro-granulin (GRN) cause frontotemporal lobar degeneration (FTLD), and other neurodegenerative diseases leading to dementia, has brought renewed interest in progranulin and its functions in the central nervous system.

Stockage

Stockage:

Stocker à -20°C. Stable pendant un an après l'expédition.

Tampon de stockage:

PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3

L'aliquotage n'est pas nécessaire pour le stockage à -20C

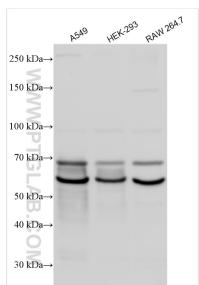

*** Les 20ul contiennent 0,1% de BSA.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Données de validation sélectionnées

Various lysates were subjected to SDS PAGE followed by western blot with 18410-1-AP (Granulin antibody) at dilution of 1:500 incubated at room temperature for 1.5 hours.
